Encyclopedia Of Islam Vol 5:

Crusader Warfare: Muslims, Mongols and the struggle against the Crusades, 1050-1300 A.D David Nicolle,2007

This book is an in depth and fascinating study of warfare during the period of the Crusades To a large extent the current interest in the Crusades reflects the perceived threat of a so called clash of civilizations While warnings of such a supposed clash in our own times are based upon a misunderstanding of the natures of both Western and Islamic civilizations some now look to the medieval Crusades as an earlier example of such conflict In reality they were no such thing Instead the Crusades resulted from a remarkable variety of political economic cultural and religious factors The Crusades involved an extraordinary array of states ruling dynasties ethnic or linguistic groups and the vast forces associated with these disparate participants *Islamic Studies* ,1992 Britannica Student Encyclopedia Encyclopaedia Britannica, Inc,2014-05-01

Entertaining and informative the newly updated Britannica Student Encyclopedia helps children gain a better understanding of their world Updated for 2015 more than 2 250 captivating articles cover everything from Barack Obama to video games Children are sure to immerse themselves in 2 700 photos charts and tables that help explain concepts and subjects as well as 1 200 maps and flags from across the globe Britannica Student is curriculum correlated and a recent winner of the 2008 Teachers Choice Award and 2010 AEP Distinguished achievement award Jerusalem Oleg Grabar,2005 The focus of this volume the fourth in the set of selected articles by Oleg Grabar is what is now known as the Old City of Jerusalem The articles selected for this volume represent nearly half a century of concern by one of the world s foremost authorities on the subject for this extraordinary city for its buildings and for the nexus of meanings associated with them *The Universal Jewish Encyclopedia ...* Isaac Landman,Simon Cohen,1942

Abrahamic Religions , Nature's Fabric David

Lee,2017-09-28 Leaves are all around us in backyards cascading from window boxes even emerging from small cracks in city sidewalks given the slightest glint of sunlight Perhaps because they are everywhere it s easy to overlook the humble leaf but a close look at them provides one of the most enjoyable ways to connect with the natural world A lush incredibly informative tribute to the leaf Nature s Fabric offers an introduction to the science of leaves weaving biology and chemistry with the history of the deep connection we feel with all things growing and green Leaves come in a staggering variety of textures and shapes they can be smooth or rough their edges smooth lobed or with tiny teeth They have adapted to their environments in remarkable often stunningly beautiful ways from the leaves of carnivorous plants which have tiny trigger hairs that signal the trap to close to the impressive defense strategies some leaves have evolved to reduce their consumption Recent studies suggest for example that some plants can detect chewing vibrations and mobilize potent chemical defenses In many cases we ve learned from the extraordinary adaptations of leaves such as the invention of new self cleaning surfaces inspired by the slippery coating found on leaves But we owe much more to leaves and Lee also calls our attention back to the fact that that our very lives and the lives of all on the planet depend on them Not only is foliage is the ultimate source of food for every

living thing on land its capacity to cycle carbon dioxide and oxygen can be considered among evolution's most important achievements and one that is critical in mitigating global climate change Taking readers through major topics like these while not losing sight of the small wonders of nature we see every day if you'd like to identify a favorite leaf Lee's glossary of leaf characteristics means you won't be left out on a limb Nature's Fabric is eminently readable and full of intriguing research sure to enhance your appreciation for these extraordinary green machines

Esposito, 1995 This unique reference is the first comprehensive encyclopedia dedicated to the institutions religion politics and culture in Muslim societies throughout the world Placing particular emphasis on the nineteenth and twentieth centuries

The Oxford Encyclopedia of the Modern Islamic World contains over 750 articles in four volumes. The focus throughout is on the Islamic dimension of the Muslim experience in recent history and background articles ground the information in its historical context and ensure continuity. Entries address political and social action as well as formal texts and emphasis is placed on the practice and theory of Islam in Muslim societies around the globe. Unlike more limited explorations of Islam, this work looks at Muslim societies in the Arab heartland as well as in South and Southeast Asia and even in Europe and the Americas. Thus it is an invaluable resource offering extensive comparative and systematic analyses of Islamic beliefs, institutions, movements, practices, and peoples on an international scale. Topical categories covered include history and geography, schools of thought, religious beliefs, theology and philosophy, mysticism, religious practice, devotionism, and ritual, religious law, politics, economics, culture, and society, and biographies. Alphabetically arranged, articles range from brief 500-word essays to major interpretive and synthetic treatments of topics such as the Islamic state, pilgrimage, law, marriage, and foreign relations. Related entries cover such topics as social and political movements, women, Muslim minorities, human rights, Islam in the West, and interreligious affairs. Truly multidisciplinary, this work reflects the breadth and depth of contemporary scholarship in Islamic studies, combining the tools of the humanities and social sciences to examine the interrelationship of religion, politics, and culture in Muslim societies and to explain the changing realities of Muslim life. Designed for easy use by both scholars and students, the work has an index and an extensive system of cross-references that provide easy access to the network of related articles throughout the encyclopedia. Entries are written by Muslim and non-Muslim scholars from around the world. Unique in its focus on the modern Islamic world, this encyclopedia is an invaluable reference for anyone concerned with Islam: scholars and students of many disciplines, government and media analysts who increasingly require an understanding of the Muslim world, and interested lay readers who are becoming more and more familiar with Islamic politics and culture.
