New English File Upper Intermediate Work:

Peer Interaction and Second Language Learning Masatoshi Sato, Susan Ballinger, 2016-03-10 This volume represents the first collection of empirical studies focusing on peer interaction for L2 learning. These studies aim to unveil the impact of mediating variables such as task type, mode of interaction and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative and mixed methods designs as well as cognitive social and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content based programs, online contexts and after school programs. To span the divide between research and practice, each study includes a section suggesting pedagogical implications.

Applied Linguistics and Materials Development Brian Tomlinson, 2013-01-31 Applies applied linguistic theories to the development of materials for language learning to add new depth to the field. *Materials development for TESOL* Freda Mishan, 2015-06-03 Materials development has become much more important in the field of TESOL in the last twenty years. Modules on materials development are now commonplace on MA TESOL courses around the world. The overall aim of the book is to introduce readers to a wide range of theoretical and practical issues in materials development to enable them to make informed and principled choices in the selection, evaluation, adaptation and production of materials. The book aims to show how these choices need to be informed by an awareness of culture, context and purpose.
