## Abstract

**Introduction** Jordanian universities teach English as a foreign language, and most instructors notice prepositional problems in writing. Most foreign-language English learners make errors. This study examines Jordanian university English learners' prepositional errors. **Methodology:** This research adopts a quantitative approach. In a qualitative approach, data are obtained from students through random and self-administered interviews. A test consisting of 25 fill-in-the-blank questions distributed to students. The quantitative approach uses questionnaires and language ability tests as tools that are distributed to first- and second-year university students as respondents from three universities in Jordan by 384 respondents. **Result:** Correlation between Jordanian universities and their obtained marks in the use of prepositions in English. The relationship between the year of study and grades obtained is low ( $r = 0.048$ ). Educational level (EL) positively adjusts the association between prepositions, English language learning, and poor prepositional writing skills. Educational level (EL) also positively mitigates the effect of prepositions and their transference. **Conclusion:** Error analysis may help EFL learners among university students in Jordan improve the use of prepositions in their writing and enhance their learning abilities in the classroom.

The languages of Malta Albert Gatt,2018 The purpose of this volume is to present a snapshot of the state of the art of research on the languages of the Maltese islands which include spoken Maltese Maltese English and Maltese Sign Language Malta is a tiny but densely populated country with over 422 000 inhabitants spread over only 316 square kilometers It is a bilingual country with Maltese and English enjoying the status of official languages Maltese is a descendant of Arabic but due to the history of the island it has borrowed extensively from Sicilian Italian and English Furthermore local dialects still coexist alongside the official standard language The status of English as a second language dates back to British colonial rule and just as in other former British colonies a characteristic Maltese variety of English has developed To these languages must be added Maltese Sign Language which is the language of the Maltese Deaf community This was recently recognised as

Malta's third official language by an act of Parliament in 2016. While a volume such as the present one can hardly do justice to all aspects of a diverse and complex linguistic situation even in a small community like that of Malta, our aim in editing this book was to shed light on the main strands of research being undertaken in the Maltese linguistic context. Six of the contributions in this book focus on Maltese and explore a broad range of topics including historical changes in the Maltese sound system, syllabification strategies, the interaction of prosody and gesture, the constraints regulating t insertion, the productivity of derivational suffixes and raising phenomena. The study of Maltese English, especially with the purpose of establishing the defining characteristics of this variety of English, is a relatively new area of research. Three of the papers in this volume deal with Maltese English, which is explored from the different perspectives of rhythm, the syntax of nominal phrases and lexical choice. The last contribution discusses the way in which Maltese Sign Language (LSM) has evolved alongside developments in LSM research. In summary, we believe the present volume has the potential to present a unique snapshot of a complex linguistic situation in a geographically restricted area. Given the nature and range of topics proposed, the volume will likely be of interest to researchers in both theoretical and comparative linguistics, as well as those working with experimental and corpus-based methodologies. Our hope is that the studies presented here will also serve to pave the way for further research on the languages of Malta, encouraging researchers to also take new directions, including the exploration of variation and sociolinguistic factors, which while often raised as explanatory constructs in the papers presented here, remain under-researched.

**A Corpus Based Study on the Preposition Error Types in Turkish EFL Learners' Essays** Mehmet Tunaz, Emrah Muyan, Nursel Muratoglu, 2016. The purpose of this study was to investigate the categories of preposition errors made by EFL learners of elementary and intermediate proficiency levels by comparing the rate of preposition errors (addition, omission, substitution) to their total preposition uses in their essays and by comparing the overall preposition usage of learners of both proficiency levels. The study was conducted with 75 learners of elementary level (A2) and 75 learners of intermediate level at Erciyes University School of Foreign Languages. Initially, 550 elementary and 230 intermediate level essays were scanned and 75 exam papers for each group were randomly chosen as the sample of the research. In the analysis, depending on Grammar of Spoken and Written English of Biber et al. (1999), total preposition numbers and erroneous preposition uses in each essay were counted and color-coded by the researchers by blind-checking the papers separately to assure the reliability. Then the erroneous prepositions were subcategorized as addition, omission, and substitution according to Corder's (1973) Common Errors in English and Categorization of Error Types. The results of the independent sample t-test indicated that there was no difference between groups in terms of addition type error. b) learners of elementary level made statistically more omission type errors than learners of intermediate learners c

learners of intermediate level made statistically more substitution type errors than learners of elementary level d percentages of preposition errors to total preposition usage in elementary level essays were statistically higher than those of intermediate level In the light of the findings of this research the importance of teaching preposition in chunks for elementary level and providing learners of intermediate level with more detailed linguistic features of preposition were emphasized
