

1. Identify examples of *ellipsis* in the following extract.
2. Discuss *how* the use of ellipsis helps to create the character of Martin's grandmother.

### Extract from 'Like a Long-legged Fly' by Ursula Dubosarsky

*Martin's grandmother had an English accent, like someone on an English television program. 'I'm a Londoner, of course,' she said. 'Always a Londoner, that's me.'*

*She'd left London years and years ago, after the end of World War Two.*

*'I was about your age,' she said to Snow. 'Hopped on a boat. All by myself. Couldn't get out of there quick enough.'*

Cloze and Coherence John W. Oller, Jon Jonz, 1994 Cloze procedure is a family of testing and teaching methods that leave blanks in discourse and ask examinees to restore the missing elements Edited and coauthored by award winning scholars Cloze and Coherence shows how and why cloze procedure is sensitive to discourse constraints and it offers a comprehensive theory of semiotics showing what coherence is and reviewing a great deal of cloze research It traces in particular the history of cloze research pertaining to studies of coherence from Hermann Ebbinghaus in the 1890s to Wilson L Taylor in the 1950s until today The research presented here aims to show that cloze scores tend to fall if discourse constraints are disrupted Also explored are many subtle questions associated with this tendency Populations discussed include native and nonnative speakers of English native and nonnative speakers of French and certain special populations such as deaf subjects and educable mentally retarded subjects Contrary to some experts it appears from the theory and the research that all of the normal subject populations as well as the special populations examined here benefit from the cognitive momentum gained from the episodic organization of ordinary discourse This finding is sustained by research from Taylor Oller et al Cziko Bachman Jonz and Taira Further some of Jonz s recent work shows why scrambling encyclopedic text Timothy Shanahan and colleagues failed to produce any significant decrement in cloze scores Jonz demonstrated empirically that some texts just as Gary A Cziko had predicted are not made more difficult by scrambling their sentences because the sentences of those texts are in some cases arranged in the manner of a list rather than a logically or chronologically structured series Scrambling the list therefore has no significant impact The final chapter of this study gives a comprehensive review of research reportedly showing that cloze is not sensitive to coherence The authors show that all those efforts suffer from fatal flaws Cloze and Coherence offers advances of two kinds First a better theoretical basis for experimental research on discourse comprehension and on literacy and language acquisition is presented which stems from a fleshed out semiotic theory Second experimental advances whose results are published here for the first time appear in various studies by Jonz Chihara et al Oller et al and Taira This work is well researched and illustrated It includes figures tables appendices a glossary and an index It will be a valuable tool for language and literacy testers and teachers

## **Language, Learning, and Behavior Disorders**

Joseph H. Beitchman, 1996-06-13 Language as a connecting bridge between learning disability and psychiatric disorder is the unifying theme of this wide ranging book Particular prominence is given to attention deficit hyperactivity disorder dyslexia and autistic disorder Explanations for the comorbidity of psychiatric and language disorder are sought in developmental cognitive and biological fields the contribution of imaging modalities is considered and implications for aetiology treatment and rehabilitation are explored Topical issues such as syndrome definition in dyslexia acquired memory disorder in childhood and biology behaviour correspondence are well covered as are a range of treatment options A final section is devoted to outcome studies Enlivened with case vignettes and offering insights into the range of current thinking on language and

behaviour this book is a rich resource for professionals and advanced students concerned with child health and development offering ideas for a unified view of language learning and behaviour problems

**Advances in Corpus-Based Contrastive Linguistics** Karin Aijmer, Bengt Altenberg, 2013 Contrastive studies have experienced a dramatic revival in the last decades By combining the methodological advantages of computer corpus linguistics and the possibility of contrasting texts in two or more languages the structure and use of languages can be explored with greater accuracy detail and empirical strength than before The approach has also proved to have fruitful practical applications in a number of areas such as language teaching lexicography translation studies and computer aided translation This volume contains twelve studies comparing linguistic phenomena in English and seven other languages The topics range from comparisons of specific lexical categories and word combinations to syntactic constructions and discourse phenomena such as cohesion and thematic structure The studies highlight similarities and differences in the use semantics and functions of the compared items as well as the emergence of new meanings and language change The emphasis varies from purely linguistic studies to those focusing on practical applications

*A Systemic Functional Grammar of Chinese* Eden Sum-hung Li, 2007-02-20 This book presents an analysis of Chinese grammar from a systemic functional perspective Its main focus is the clausal grammar of Chinese and Dr Li provides a thorough analysis of Chinese clauses according to their constituent parts However uniquely the second half of the book extends this examination into an analysis of Chinese discourse and text analysis Professor Halliday s foreword praises Eden Li s thorough analysis and shows its relevance to the field of systemic functional linguistics in general Systemic Functional Grammar of Chinese provides the reader with a general theoretical framework of grammar and discourse analysis from a systemic functional perspective

**The Semiotics of Subtitling** Zoe De Linde, Neil Kay, 2016-04-08 Subtitling serves two purposes to translate the dialogue of foreign language films for secondary audiences interlingual and to transform the soundtrack of television programmes into written captions for deaf and hard of hearing viewers intralingual While both practices have strong linguistic roots often being compared to text translation and editing this book reveals the complex influences arising from the audiovisual environment Far from being simply a matter of linguistic equivalence the authors show how the effectiveness of subtitles is crucially dependent upon the hidden semiotic relations between text and image relations which affect the meaning of the visual linguistic message and the way in which that message is ultimately received Focusing primarily on intralingual subtitling The Semiotics of Subtitling adopts a holistic approach combining linguistic theory with empirical eye movement analysis in order to explore the full depth of the medium and the reading behaviour of viewers

**GECCo - German-English Contrasts in Cohesion** Kerstin Kunz, Ekaterina Lapshinova-Koltunski, José Manuel Martínez Martínez, Katrin Menzel, Erich Steiner, 2021-10-25 In contrastive linguistics of English and German there is a tradition of accounting for contrasts with respect to grammar and to a lesser extent for lexis and phonetics Moving on to discourse and text there is a sizeable body of literature on cohesive patterns in English and German respectively but very

little in terms of a comparison. The latter though is of particular interest for language learners, translators and of course linguists and researchers in language technology. This book attempts to close this gap based on a number of years of corpus based study into variation and cohesion in the two languages. While there is an overall focus on language contrasts, it also investigates variation between different registers, language internally and between written and spoken mode in particular. For each of the five major types of cohesion, co-reference, substitution, ellipsis, conjunctive relations and lexical cohesion, overviews are given of contrasts in the system and of contrastive frequencies in texts. Results and methods presented in this book are thus relevant for language teaching, translation, language technology and corpus based work on English and German generally.

**Teaching and Learning in Saudi Arabia** Amani K Hamdan, 2015-12-01 Saudi Arabia is witnessing unprecedented progress in the field of higher education. Even though the country opened its first university in 1957, so far there seems to be little English scholarly writing about Saudi education in general and higher education in particular. The current expansion of Saudi Arabia's higher education system has put a spotlight on this serious gap in the international literature. This book helps to fill this lacuna through the work of 16 scholars who have contributed to the development of the Saudi education system. In so doing, the book reveals areas where more research is required and thus provides a useful starting point for education scholars. This anthology is unique in that it is the first to offer a comprehensive perspective on the current knowledge base pertaining to Saudi higher education as well as to the ongoing efforts to introduce reforms.

**In Other Words** Mona Baker, Henry Jones, 2026-01-22 *In Other Words* has been the definitive coursebook for students studying translation for more than three decades. Assuming no knowledge of languages other than English, it offers a practical guide based on extensive research in areas as varied as lexis, grammar, pragmatics, semiotics and ethics. It thus provides a solid basis for training a new generation of well-informed critical students of translation. The fourth edition builds further on linguistic theory and the literature on ethics to guide trainee translators through key decision-making processes. Each chapter explains core concepts, identifies potential translation challenges and offers a range of strategies for addressing them, supported by authentic examples from various languages and genres. Building on its established foundation, this edition breaks new ground by incorporating contemporary translation challenges across digital platforms, including social media websites and patient information materials, offering fresh perspectives on translating popular science, tourism content and museum documentation. It provides new insights into recent technological advances and their impact on the profession and includes a section on ethics of care in translation and interpretation practice. This comprehensive guide, now written by Mona Baker and Henry Jones, combines theoretical frameworks with practical examples, making it an essential resource and coursebook for both students and practising translators navigating today's diverse linguistic landscape.

*Issues in Language Testing Research* John W. Oller, 1983      *Lexical Repetition in Text* Krisztina Károly, 2002 This book explores lexical repetition and its text-organizing function in English written discourse. It intends to contribute to three main areas of

study It contributes to cohesion analysis by showing that by treating the concept of repetition in a new broader sense lexical cohesion as a whole may be seen in fact as various forms of lexical repetition It also contributes to repetition research because it demonstrates that lexical repetition and the way it clusters in text make a unique contribution to the organizational quality of written discourse Finally it contributes to English written text analysis in that it partly answers a question that has long been bedeviling the science of text whether or not there exists a way to measure subjective intuition objectively This study shows that there is a way to measure subjective intuitive perceptions of discourse quality via objective means that is through the analysis of linguistic elements identifiable on the textual surface Contents The text organizing function of lexical repetition in English written discourse Main schools and advances of product oriented English written text analysis A theoretical grounding for the analysis of lexical cohesion as various forms of lexical repetition A refined version of Hoey s 1991 repetition model *The Relationship Between the Cohesive Structure of Spoken and Written Language in School Age Children* Gail Carol Potechin,1986 *Lexical Repetition in Academic Discourse* Maria Adorjan,2019-04-03 Doctoral Thesis Dissertation from the year 2016 in the subject Speech Science Linguistics grade A E tv s Lor nd Tudom nyegytem Doctoral School of Education course PhD Programme in Language Pedagogy language English abstract Due to the various functions and diverse attitudes to lexical repetition in discourse it is an aspect of cohesion which creates difficulty for raters when assessing L2 academic written discourse Current computer aided lexical cohesion analysis frameworks built for large scale assessment fail to take into account where repetitions occur in text and what role their patterns play in organizing discourse This study intends to fill this gap by applying a sequential mixed method design drawing on Hoey s 1991 theory based analytical tool devised for the study of the text organizing role of lexical repetition and its refined version K roly s 2002 lexical repetition model which was found to be capable of predicting teachers perceptions of argumentative essay quality with regard to its content and structure It first aims to test the applicability of the previous models to assessing the role of lexical repetition in the organization of other academic genres then propose a more complex computer aided analytical instrument that may be used to directly assess discourse cohesion through the study of lexical repetition In order to test the applicability of K roly s model on other academic genres two small corpora of thirty five academic summaries and eight compare contrast essays were collected from English major BA students at E tv s Lor nd University The lexical repetition patterns within the corpora were analyzed manually in the case of the summaries and partially with a concordance program in the case of the compare contrast essays The findings revealed that in both genres lexical repetition patterns differed in high and low rated texts Given that in its present form the model cannot be used on large scale corpora in the third stage of the research a computer aided model was designed for large scale lexical repetition analysis First by employing the theoretical empirical and methodological results gained from the corpora several new analytical steps were proposed and built into a modular format Next in order to better align the new computer aided analysis to its manual version parallel

processes were identified between the new analytical model and an existing sociocognitive framework The newly proposed model may help teachers to assess discourse cohesion or can be used as a self study aid by visualizing the lexical net created by semantic relations among sentences in text
