Unique Alison Allen-Gray,2011-11-03 Dominic has always been a disappointment to his ambitious father but he has never understood why Then he discovers that he had an older brother who died before he was born Where his brother was a brilliant academic and scientist Dominic prefers to waste his time painting His father cannot forgive him for it Dominic decides to try to find out about his brother but he discovers more than he bargained for Their father had Dominic s dead brother cloned and Dominic is the result How can he live with this mind blowing discovery If the truth is ever made public it could put people s lives in danger including his own Engineering the Human Bert Jaap Koops,Christoph H. Lüthy,Annemiek Nelis,Carla Sieburgh,J.P.M. Jansen,Monika S. Schmid,2013-02-12 The volume is collection of articles treating the topic of human improvement enhancement from a variety of perspectives philosophical literary medical genetic sociological legal etc The chapters in this volume treat not only those aspects that most immediately come to mind when one thinks of human enhancement such as genetic engineering cloning artificial implants and artificial intelligence etc Somewhat less obvious aspects include evolutionary perspectives in connection with the prolongation of the human lifespan plastic surgery since its beginnings and questions such as whether the distinction between natural and artificial can really be drawn at all and how it has been conceived across the ages or what the legal implications are of recent developments and techniques Many papers make links to the representation of these developments in popular culture from Jules Verne through Aldous Huxley to the movie Gattaca address the hopes and fears that come with them as well as the question how realistic these are While all chapters are written by scientists at the international top of their respective fields all are accessible to a non specialist audience and eminently readable We believe that they represent a state of the art overview of questions that are of interest to a large audience The book thus targets a non specialist audience with an interest in philosophical sociological scientific and legal issues involved in both traditional and recent matters concerning the desire of mankind to improve itself the human body the human mind and the human condition It is unique in that it brings together all these aspects within a coherent and cohesive collection Unique Alison Allen-Gray,2022-08-12 When Dominic finds the photo in his granddad s loft at first he can t believe what he is seeing How can it be possible How can there be someone else looking so like him And then it beings to dawn on him that this must be his brother But why has he never been told that he had a brother Why has it been kept secret And what happened to him When his parents refuse to tell him anything Dominic decides to find out the truth for himself But when he starts his search Dominic uncovers a horrifying secret and unleashes a chain of events that will have far reaching and disastrous consequences for everyone involved Representations of Technology in Science Fiction for Young People Noga Applebaum,2009-09-10 In this new book Noga Applebaum surveys science fiction novels published for children and young adults from 1980 to the present exposing the anti technological bias existing within a genre often associated with the celebration of technology Applebaum argues that perceptions of technology as a corrupting

force particularly in relation to its use by young people are a manifestation of the enduring allure of the myth of childhood innocence and result in young adult fiction that endorses a technophobic agenda This agenda is a form of resistance to the changing face of childhood and technology s contribution to this change Further Applebaum contends that technophobic literature disempowers its young readers by implying that the technologies of the future are inherently dangerous while it neglects to acknowledge children s complex yet pleasurable interactions with technology today The study looks at works by well known authors including M T Anderson Monica Hughes Lois Lowry Garth Nix and Philip Reeve and explores topics such as ecology cloning the impact of technology on narrative structure and the adult child hierarchy While focusing on the popular genre of science fiction as a useful case study Applebaum demonstrates that negative attitudes toward technology exist within children s literature in general making the book of considerable interest to scholars of both science fiction and children s literature
