Sustainable Construction Materials and Technologies Yoon-Moon Chun, Peter Claisse, Tarun R. Naik, Eshmaiel Ganjian, 2007-05-31 The construction materials industry is a major user of the world's resources. While enormous progress has been made towards sustainability, the scope and opportunities for improvements are significant. To further the effort for sustainable development, a conference on Sustainable Construction Materials and Technologies was held at Coventry University, Coventry, U.K. from June 11th-13th, 2007, to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies. This book presents selected important contributions made at the conference. Over 190 papers from over 45 countries were accepted for presentation at the conference, of which approximately 100 selected papers are published in this book. The rest of the papers are published in two supplementary books. Topics covered in this book include sustainable alternatives to natural sand, stone, and Portland cement in concrete; sustainable use of recyclable resources such as fly ash, ground municipal waste slag, pozzolan, rice husk ash, silica fume, gypsum, plasterboard, drywall, and lime in construction; sustainable mortar, concrete bricks, blocks, and backfill; the economics and environmental impact of sustainable materials and structures; use of construction and demolition wastes and organic materials; straw bale, hemp, etc. in construction; sustainable use of soil, timber, and wood products; and related sustainable construction and rehabilitation technologies. [Proceedings of the 2025 8th International Conference on Traffic Transportation and Civil Architecture \(ICTTCA 2025\)](#) Gaofeng Zhao, Law Teik Hua, Weizheng Liu, Weiguang Zhang, 2025-07-26 This book is an open access. Transportation is the pioneer of economic development. In recent years, roads and bridges extend in all directions; the transportation is convenient and fast, and the logistics supply chain is stable and smooth. The transportation industry has been developing rapidly and has built a safe, convenient, efficient, green, and economic modern comprehensive transportation system. In response to the requirements of the rapid development of various engineering construction, people continue to put forward new civil engineering topics, summarize successful experience through engineering practice, and promote the construction of transportation engineering. The 2025 8th International Conference on Traffic Transportation and Civil Architecture (ICTTCA 2025) will be held on April 18-20, 2025, in Tianjin, China. We sincerely invite scholars and technicians from relevant units to actively participate in the conference, exchange technology, and promote innovation. **Proceedings of the International Conference on Information Engineering and Applications (IEA) 2012** Zhicai Zhong, 2013-04-04 Information engineering and applications is the field of study concerned with constructing information computing intelligent systems, mathematical models, numerical solution techniques, and using computers and other electronic devices to analyze and solve natural scientific, social scientific, and engineering problems.
