These applications (as shown, but not not limited to the following):

- a) Offshore oil exploration and production applications. These cranes are typically mounted on a fixed structure, platform, structure, floating platform, structure, or ship-shaped vessel used in drilling and production operations for offshore cranes and storage.
- b) Offshore applications. These lifting devices (rated for 25,000 lbs (11,340 kg) or more) are mounted on surface vessels used to lift and move offshore structures, pipes, drilling tools systems, surface components, and other materials on the vessel. Service vessels, see (for use on 60, 80, and 100).
- c) Floating applications. Cranes for floating applications are mounted on barges, self-unloading vessels or other vessels, and are used in construction and storage operations above and below the sea surface.

Equipment as a result of such testing used here for loading, operating, inspection, etc. tests or the design and not included in the scope of this recommended practice.
