Math Memory Magic Joan E. Host, 2005-10-19 Parents and teachers have been looking for a fresh approach to make math more interesting and memorable This series of books uses a unique Story Format introducing startling characters whose looks and personalities are intrinsic to the math concepts and operations they represent Joan Host developed the approach while teaching remedial math students in a Pennsylvania public middle school Her first group of 59 students had only three months of twice weekly classes Their state math competency test scores increased an average of 58% The following year Joan s new group of students had five months of twice weekly classes Scores increased an average of 76% The lessons were later tested with low English proficiency students in multicultural Jersey City New Jersey Besides improvement there was an unexpected finding in the test results After completing THE WHOLE NUMBER STORY and its post test students took the pretest for the second book THE DECIMAL TALE and scored higher than they had on the whole number pretest This result made clear that taking time to undo old misconceptions of very basic concepts can jumpstart remediation at a higher level This book can help you accomplish that mission for your students Math Memories You Can Count on Jo-Anne Lake, 2009 Organized around the five math strands number sense and numeration measurement geometry and spatial sense patterning and algebra and data management and probability Includes activity ideas rooted in children s literature and encourages links with relevant manipulatives Included also are book lists reproducible activities and assessment strategies **MacUser**, 1994 **Macworld**, 1992 Math Horizons, 1997 **Resources in education**, 1983-09 Magic, 1910 Being and Value Frederick Ferre, 1996-02-22 Being and Value begins with a discussion on metaphysics showing the vital relationship between human life and the philosophical placement of value and emphasizing the current transition from the old mechanical worldview to the postmodern alternative inspired by ecology Being and Value shows how intimately premodern philosophy bound value into the fabric of things and analyzes the expulsion of value from factual being during the modern period Special attention is given to beauty What is the relationship between the subjective and objective conditions of beauty Is the beauty of nature merely the product of human appreciation The answer is that beauty and value is a more potent ingredient in the structure of things than modern reductionism allows **Giordano Bruno and the Geometry of Language** Arielle Saiber, 2005 Giordano Bruno and the Geometry of Language brings to the fore a sixteenth century philosopher s role in early modern Europe as a bridge between science and literature or more specifically between the spatial paradigm of geometry and that of language Through analysis of Bruno s writings Saiber exposes the verbal geometry of his language and shows how his writing necessitates a crafting of space and is in essence a lexicon of spatial concepts This study constitutes an original contribution both to scholarship on Bruno and to the broader fields of early modern scientific and literary studies R.R.
