You'll learn to retrieve weather data from a web service and display it on an analog needle meter and build a home security system using the Raspberry Pi. The next project has a modern twist where we employ the Raspberry Pi to send a signal to a web service that will send you a text when someone is at the door. In the final project, you take what you've learned from the previous two projects and create an IoT robot car that you can use to monitor what your pets are up to when you are away. By the end of this book, you will be well versed in almost every possible way to make your IoT projects stand out. What you will learn: Install and set up a Raspberry Pi for IoT development. Learn how to use a servo motor as an analog needle meter to read data. Build a home security dashboard using an infrared motion detector. Communicate with a web service that sends you a message when the doorbell rings. Receive data and display it with an actuator connected to the Raspberry Pi. Build an IoT robot car that is controlled through the internet.
