Leadership pervades every aspect of organizational and social life and its study has never been more diverse nor more fertile. With contributions from those who have defined that territory, this volume is not only a key point of reference for researchers, students, and practitioners but also an agenda-setting, prospective and retrospective look at the state of leadership in the twenty-first century. It evaluates the domain and stretches it further by considering leadership scholarship from every angle, concluding with an optimistic look at the future of leaders, followers, and their place in organizations and society at large. Each section represents a distinctive slant on leadership: Macro perspectives including strategic leadership, organization theory, charismatic leadership, complexity leadership, and networks; Political and philosophical perspectives including distributed leadership, critical leadership, ethics, the military, and cults; Psychological perspectives including personality, leadership style, and contingency theories; Transformational leadership, exchange relationships, shared leadership, cognition, leadership development, gender, trust, identity, and the dark side of leadership; Cultural perspectives including spirituality, aesthetics, and creativity; Contemporary and emergent perspectives: followership, historical methods, virtual leadership, emotions, image, celebrity, and the quest for a general theory of leadership.

Executive Officer and President General Motors Corporation From the Foreword Preparing for a Sustainable Future  
David Crowther, Shahla Seifi, 2023-06-29 The term sustainability has become one of the most significant in the current era It seems to be ubiquitous amongst academics politicians business leaders media personnel and even the general public It is no exaggeration to state that it is considered all over the world to be the most pressing issue to be addressed for the long term future of the planet and its inhabitants The topic is of course complex and the issue of sustainability is under much debate as to what it actually is and how it can be achieved but it is completely certain that the resources of the planet are fixed in quantity and once used cannot be reused except through being reused in one form or another At present much of the discourse of sustainability has focused upon the environment and in particular upon climate change and the effects that this is having Thus the discourse has tended to be about mitigation Sustainability of course requires all three pillars of the triple bottom line economic environmental and social to be addressed Indeed it might be considered that the effects upon the social and how we choose to live our lives might well be the most profound effect of achieving sustainability This book therefore focuses upon some of the many aspects of the social and how we can adapt our lives to accommodate the requirements of sustainability it therefore takes a very different approach to addressing the issues of sustainability while of course not ignoring the other pillars This book therefore sets out to examine various aspects of the changes to personal corporate and institutional behaviour which may have to come about in our search for sustainability It is tended to address some of the issues and how they are being dealt with in various parts of the world As always our concept is to share best practice and thereby enrich both the discourse and our progress towards sustainability Thus we focus upon the current situation while also considering the extent to which the focus is changing so much that we need to think about new approaches to our understanding of behaviour and differing effects in practice The international origins of the contributors to this book make this an original contribution taking some of the best ideas from around the world This book therefore addresses these issues from a perspective not generally addressed by researchers or even by politicians and the press It therefore provides fresh perspectives upon the important issue of our common future As always this approach is based on the tradition of the Social Responsibility Research Network [srrnet.org](http://srrnet.org) a worldwide body of scholars with membership of several thousand which in its 20 year history has sought to broaden the discourse and to treat all research as inter related and relevant to business This tradition has always been to explore the subject widely and to seek relevant solutions while also sharing best practice This book is based primarily upon some of the contributions from the network at our recent conference and shows both commonality and diversity in approaches and effects *The Leadership Quarterly*, 1997 **Leadership Behavior and Role Preparation of First-line Managers in Critical Care** Kathleen Ann Ohman, 1997 *The 71F Advantage: Applying Army Research Psychology for Health and Performance Gains*, *Leaders' Perspectives on Neighborhood Organization* Leadership Lela Louise Vandenberg, 1993 Contemporary Leadership Behavior Eleanor C.
