Interface 90 is the continuation of an extremely successful symposium series. The series has provided a forum for the interaction of professionals in statistics, computing science, and in numerical methods wherein they may discuss a wide range of topics at the interface of these disciplines. This is the 22nd Symposium on the Interface Computing Science and Statistics, held 16-19 May 1990 at the Kellogg Center on the campus of Michigan State University and is the third Symposium to be held under the recently organized Interface Foundation of North America. The Interface Board of Directors consists of the nine most recent Symposium Chairs: James E. Gentle, Lynne Billard, David M. Allen, Thomas J. Boardman, Richard M. Heiberger, Edward J. Wegman, Linda Malone, Raoul LePage, and Jon Kettenring. The officers of the Interface are William Eddy, Board Chairman and Executive Director, Edward Wegman, President and Treasurer, Lynne Billard, Secretary. My valued colleague Connie Page, Editor of this Proceedings Volume, and generally bright and hardworking person, has organizational skills of a higher order which were successfully brought into play during many critical junctures not strictly connected with the Proceedings. Edward Wegman, Barbara Barringer, Bill Eddy, and George Styan all pitched in with useful information on numerous occasions. Our Keynote Speaker, Peter G. Hall, and Plenary Speakers, David L. Donoho, Jerome H. Friedman, who also gave a short course, Bruce Hajek, John Skilling, and C. F. Data Mining Using SAS Enterprise Miner, Randall Matignon, 2007-08-03

The most thorough and up-to-date introduction to data mining techniques using SAS Enterprise Miner. The Sample Explore, Modify Model, and Assess SEMMA methodology of SAS Enterprise Miner is an extremely valuable analytical tool for making critical business and marketing decisions. Until now there has been no single authoritative book that explores every node relationship and pattern that is a part of the Enterprise Miner software with regard to SEMMA design and data mining analysis. Data Mining Using SAS Enterprise Miner introduces readers to a wide variety of data mining techniques and explains the purpose of and reasoning behind every node that is a part of the Enterprise Miner software. Each chapter begins with a short introduction to the assortment of statistics that is generated from the various nodes in SAS Enterprise Miner v4.3, followed by detailed explanations of configuration settings that are located within each node. Features of the book include: The exploration of node relationships and patterns using data from an assortment of computations, charts, and graphs commonly used in SAS procedures. A step-by-step approach to each node discussion along with an assortment of illustrations that acquaint the reader with the SAS Enterprise Miner working environment. Descriptive detail of the powerful Score node and associated SAS code which showcases the importance of managing, editing, executing, and creating custom designed Score code for the benefit of fair and comprehensive business decision making. Complete coverage of the wide variety of statistical techniques that can be performed using the SEMMA nodes. An accompanying Web site that provides downloadable Score code training.
