Dabney, **Engineering and Scientific Computations Using MATLAB** Sergey E. Lyshevski, 2005-01-21 Master MATLAB step by step The MATLAB MATRIX LABORATORY computational environment offers a rich set of capabilities to efficiently solve a variety of complex analysis simulation and optimization problems Flexible powerful and relatively easy to use the MATLAB environment has become a standard cost effective tool within the engineering science and technology communities Excellent as a self teaching guide for professionals as well as a textbook for students Engineering and Scientific Computations Using MATLAB helps you fully understand the MATLAB environment build your skills and apply its features to a wide range of applications Going beyond traditional MATLAB user manuals and college texts Engineering and Scientific Computations Using MATLAB guides you through the most important aspects and basics of MATLAB programming and problem solving from fundamentals to practice Augmenting its discussion with a wealth of practical worked out examples and qualitative illustrations this book demonstrates MATLAB's capabilities and offers step by step instructions on how to apply the theory to a practical real world problem In particular the book features Coverage of a variety of complex physical and engineering systems described by nonlinear differential equations Detailed application of MATLAB to electromechanical systems MATLAB files scripts and statements as well as SIMULINK models which can be easily modified for application specific problems encountered in practice Readable user friendly and comprehensive in scope this is a welcome introduction to MATLAB for those new to the program and an ideal companion for engineers seeking in depth mastery of the high performance MATLAB environment **Specification and Design Methodology for Real-Time Embedded Systems** Randall S. Janka, 2012-12-06 Specification and design methodology has seen significant growth as a research area over the last decade tracking but lagging behind VLSI design technology in general and the CAD industry in particular The commercial rush to market tries to leverage existing technology which fuels CAD design tool development Paralleling this is

very active basic and applied research to investigate and move forward rational and effective methodologies for accomplishing digital design especially in the field of hardware software codesign It is this close relationship between industry and academia that makes close cooperation between researchers and practitioners so important and monographs like this that combine both abstract concept and pragmatic implementation deftly bridge this often gaping chasm It was at the IEEE ACM Eighth International Symposium on Hardware Software Codesign where I met the author of this monograph Dr Randall Janka who was presenting some of his recent dissertation research results on specification and design methodology or as he has so succinctly defined this sometimes ambiguous concept the tools and rules Where so many codesign researchers are trying to prove out different aspects of codesign and using toy applications to do so Dr Janka had developed a complete specification and design methodology and prototyped the infrastructure and proven its viability utility and effectiveness using a demanding real world application of a real time synthetic aperture radar imaging processor that was implemented with embedded parallel processors

Computational Intelligence in Control Engineering Robert E. King,1999-02-16 Presenting the theoretical and practical developments of an autonomous decision making methodology this work describes the strides made by intelligent systems and soft computing for the control of industrial systems It uses practical examples of qualitative control techniques tested in industry and provides suitable intelligent computational algorithms and interfaces for industrial applications
