## **Coders Work Reflections Craft Programming Epub Book:**

**Coders at Work** Peter Seibel, 2010-05-04 Peter Seibel interviews 15 of the most interesting computer programmers alive today in *Coders at Work* offering a companion volume to Apress's highly acclaimed best seller *Founders at Work* by Jessica Livingston. As the words at work suggest Peter Seibel focuses on how his interviewees tackle the day to day work of programming while revealing much more like how they became great programmers how they recognize programming talent in others and what kinds of problems they find most interesting. Hundreds of people have suggested names of programmers to interview on the *Coders at Work* web site [www.codersatwork.com](http://www.codersatwork.com). The complete list was 284 names. Having digested everyone's feedback we selected 15 folks who've been kind enough to agree to be interviewed: Frances Allen Pioneer in optimizing compilers first woman to win the Turing Award 2006 and first female IBM fellow; Joe Armstrong Inventor of Erlang; Joshua Bloch Author of the Java collections framework now at Google; Bernie Cosell One of the main software guys behind the original ARPANET IMPs and a master debugger; Douglas Crockford JSON founder JavaScript architect at Yahoo; L. Peter Deutsch Author of Ghostscript implementer of Smalltalk 80 at Xerox PARC and Lisp 1.5 on PDP 1; Brendan Eich Inventor of JavaScript CTO of the Mozilla Corporation; Brad Fitzpatrick Writer of LiveJournal OpenID memcached and Perlbal; Dan Ingalls Smalltalk implementor and designer; Simon Peyton Jones Coinventor of Haskell and lead designer of Glasgow Haskell Compiler; Donald Knuth Author of *The Art of Computer Programming* and creator of TeX; Peter Norvig Director of Research at Google and author of the standard text on AI; Guy Steele Coinventor of Scheme and part of the Common Lisp Gang of Five currently working on Fortress; Ken Thompson Inventor of UNIX; Jamie Zawinski Author of XEmacs and early Netscape Mozilla hacker.

*Code Craft* Pete Goodliffe, 2006-12-06 You know how to write code that works but what about code that's well written and easy to understand. And robust and bug free. If other programmers looked at your handiwork would they be able to figure out the code's logic and purpose. Exceptional programmers have more than just technical know-how they adopt the right approach and attitude to development. *Code Craft* will help take your programming beyond writing correct code to writing great code thus turning you into a true programming professional or enhancing your existing professional skills. With language agnostic advice that's relevant to all developers *Code Craft* covers code writing concerns such as presentation style, variable naming, error handling and security. And it tackles broader real world programming issues like effective teamwork, development processes and documentation. Each chapter ends with a Q/A section that reviews key concepts to get you thinking like an expert making it an especially great reference for newer programmers who want to work professionally and efficiently as part of a team. This survival guide for the software factory will show you how to write good code when the world's not helping you. Avoid disasters and distractions in the workplace. Assess your abilities accurately and determine ways to improve. Adopt productive attitudes and follow best practices. There's little more valuable than the advice of a true programming professional. You'll find *Code Craft* to be clear, practical and entertaining throughout and a great way to take
