

DISCOURSE ANALYSIS

Discourse analysis is an approach to the study of language that demonstrates how language shapes reality and reveal dominant ways of thinking an acting.

OVERVIEW

Discourse analysis involves the examination of how the 'ways of speaking about things' normalizes and privileges some frames of thinking about things while marginalizing others.

As a simple example, if movies consistently frame the ideal female as passive, silent, and submissive, then this becomes normalized in the "dominant discourse" of gender.

EXAMPLE

Studying Government Policies: A discourse analysis of policy texts would involve looking at the keywords, metaphors, and phrases used in the text and how they reveal ideological frameworks and viewpoints of the government of the day. These sorts of studies often demonstrate how the language of policy texts normalizes some behaviors and marginalizes others.

Discourse And Practice:

Discourse and Practice Theo van Leeuwen, 2008-05-01 Adding a new introduction and two previously unpublished papers *Discourse and Practice New Tools for Critical Discourse Analysis* brings together van Leeuwen's methodological work on discourse analysis of the last 15 years. Discourse van Leeuwen argues is a resource for representation a knowledge about some aspect of reality which can be drawn upon when that aspect of reality has to be represented a framework for making sense of things. And they are plural. There can be different discourses different ways of making sense of the same aspect of reality that serve different interests and will therefore be used in different social contexts. However abstract some discourses are discourses ultimately always represent doings van Leeuwen argues. Doing is the foundation of knowing and social practices are the foundation of discourses. Studying children's books newspaper reports brochures and other texts as well as photographs and children's toys van Leeuwen investigates what can happen when practices are transformed into discourses and provides analytical tools for reconstructing discourses from texts. Throughout the book van Leeuwen makes connections between sociological and linguistic or semiotic concepts and methods to ensure the social and critical relevance of his analytical categories. van Leeuwen's work has already been widely used by critical discourse analysts across the world. This volume will be a welcome guide for anyone looking for a form of discourse analysis that is both explicit and methodical and critically incisive.

Moral Discourse and Practice Stephen L. Darwall, Peter Railton, Allan Gibbard, 1997 Mediated Discourse Ron Scollon, 2002-09-26 *Mediated Discourse The Nexus of Practice* sets out a discursive theory of human action. Language and action are intimately related. The difficult question to answer is how they are related. Mediated Discourse Theory looks into social relationships to see how the use of language is both a form of action in itself and is also indirectly related to all other forms of human action. Through the empirical study of a one year old child learning to exchange objects with caregivers Scollon challenges the commonly held claim that all practices are represented in discourse and that all discourse has the function of structuring practice. Calling upon work in interactional sociolinguistics critical discourse analysis anthropological linguistics sociocultural psychology and intercultural communication the Mediated Discourse Theory set out in this book resolves current problematic issues such as how practices are learned across the boundaries of groups and how individuals come to be socialized as social actors.

Sense of Complexity in Projects Steve Raue, 2024-11-25 This book explores project management PM from a new perspective Project management is facing a paradigmatic stalemate Its major challenge is complexity Its current paradigmatic foundation in first order cybernetics has reached its limits More tools are created and project management is applied to any potential context expecting better results while doing more of the same Beyond conventional project management agile and other project management approaches have emerged as new options to answer the complexity challenge Yet the question remains whether new options and more tools in light of the current shortcomings can create enough momentum for project management as a whole to overcome its paradigmatic stalemate and evolve toward new paradigms based on second order cybernetics This book will embark on a journey to explore current paradigms in project management and argue why an analysis of discourse practices in project management may be critical to generating new paradigmatic perspectives The aim of this book is to provide an alternative perspective on projects as discourses and project management as a means to observe and conduct these discourses Instead of defining what projects and project management are the approach is to look at what people talk about when doing projects and apply project management It will arrive at a picture of how discourses about project management are shaped and institutionalised through the sensemaking of individuals and selected communities in their specific project practice and how these discourses shape project management in turn It is argued that this self reinforcing circle leads to a certain solidification of project management paradigms which prove insufficient in dealing with project complexity However it will also be argued that project practitioners can utilise their self reflection and self description of these discourse conventions to obtain more meaningful project conversations and arrive at a unified and systemically integrated understanding of project management This book will be of particular relevance to those interested in current issues underlying project management More generally it will be a valuable resource for researchers of project management organisational studies and governance **Complicity in Discourse and Practice** Jef

Images of a Constitution William E. Conklin, 2024-07-01 Originally published in 1989 in this remarkable conjunction of constitutional theory jurisprudence literary theory constitutional law and political theory William Conklin first tells us what a constitution is not it is not a text nor a compendium of judicial and legislative decisions interpreting a text nor a set of doctrines nor moral political values nor customs nor a priori conceptions A constitution he argues is an image which exists through the legal consciousness of a community Using a wide range of Canadian judicial decisions as examples Conklin shows that the classic cases have been those where the boundaries of two conflicting images clashed In each instance the subject matter itself collapses into a search for a coherent image of what a constitution is all about The dominant image of a constitution in Canadian judicial discourse has been a rationalist one emanating from the Enlightenment understanding of knowledge Turning to academic writings on Canadian federalism law Conklin goes on to identify clearly the boundaries of three versions

of rationalism and to show that Canadian scholars have shared with judges the dominant image of rationalism In the third part of his essay the author makes a prescriptive claim namely that a text such as the Canadian Charter of Rights and Freedoms arguably raises issues which the rationalist image of a constitution precludes as legitimate inquiries He identifies a further general image of a constitution in Canadian legal discourse a teleological one which is rooted in the writings and judgments of Ivan Rand Finally he uses the contours of the Rand image to work out a further image of constitution an image that allows lawyers to entertain issues of both theory and social cultural practice thereby placing them in a position to alleviate the pain and suffering of those in need

Discourse and Practice Frank E. Reynolds, David Tracy, 1992-05-14
Discourse and Practice strives to stretch the boundaries of commonly accepted notions of philosophical discourse in order to introduce comparative considerations It is united by a concern to tease out the philosophical discourse and practices which inhere in seemingly unphilosophical texts These texts range from ethnographical materials to mythical and fictive narratives and finally to explicitly theoretical traditions Each author in attending to the details of his or her area study strives to demonstrate the implicit and explicit philosophical agendas at play The comparative examples offer valuable insights for how discourse can be redefined One consistent assumption presented here is that the element of practice which has long been posed in opposition to theory must be treated as an integral aspect of the philosophical import of any tradition Historical traditions covered include East Asia Papua New Guinea and Tibet as well as the more familiar territory of Western disciplinary fields

Language and Power Norman Fairclough, 1989 Examines how language functions in maintaining and changing power relations in modern society It discusses ways of analysing language which can reveal these processes how people can become more conscious of them and more able to resist and change them
