Hill, John Buckler, 1987 *A History of the Two Indies* abbé Raynal (Guillaume-Thomas-François), 2006 First published in 1770 and running to over one million words Raynal's *Histoire des Deux Indes* was an immediate bestseller that was to go through numerous editions in various languages Much of the *Histoire*'s success and subsequent reputation was based on its attacks on tyranny slavery and colonial exploitation In this current edition Peter Jimack has chosen a representative selection of passages from all books of the *Histoire* that shows the breadth and scope of the work **The Pursuit of Happiness** Sarah Heaner Lancaster, 2010-12-08 People want to be happy Nothing could be more obvious and yet this common and evident goal is not as easy to achieve as it is to desire The Christian tradition has understood happiness to be gained through relationship with God and it has much to say about what will make us truly happy and what will not This book examines happiness from a Christian perspective using John Wesley as the focus of study because he understood happiness with God to be the very goal of Christian life He also understood that Christian happiness needed to acknowledge the difficulties of life This book seeks to learn from the wisdom of the past in order to imagine how Christians today might talk about happiness in a way that is faithful to the tradition and engages the world as well **Treatise on Slavery** Alonso de Sandoval, 2008-03-14 In *De instauranda Aethiopia salute 1627* the earliest known book length study of African slavery in the colonial Americas Jesuit priest Alonso de Sandoval described dozens of African ethnicities their languages and their beliefs and provided an exposé of the abuse of slaves in the Americas This collection of previously untranslated selections from Sandoval's book is an invaluable resource for understanding the history of the African diaspora slavery in colonial Latin America and the role of Christianity in the formation of the Spanish Empire it also provides insights into early modern European concepts of race A general Introduction and headnotes to each selection provide cultural historical and religious context copious footnotes identify terms and references that may be unfamiliar to modern readers A map and an index are also provided **Science and Religion in Neo-Victorian Novels** John Glendening, 2013-04-17 Criticism about the neo Victorian novel a genre of historical fiction that re imagines aspects of the Victorian world from present day perspectives has expanded rapidly in the last fifteen years but given little attention to the engagement between science and religion Of great interest to Victorians this subject often appears in neo Victorian novels including those by such well known authors as John Fowles A S Byatt Graham Swift and Mathew Kneale This book discusses novels in which nineteenth century science including geology paleontology and evolutionary theory interacts with religion through accommodations conflicts and crises of faith In general these texts abandon conventional religion but retain the ethical connectedness and celebration of life associated with spirituality at its best Registering the growth of nineteenth century secularism and drawing on aspects of the romantic tradition and ecological thinking they honor the natural world without imagining that it exists for humans or functions in reference to human values In particular they enact a form of wonderment the capacity of the mind to make sense of creatively adapt and

enjoy the world out of which it has evolved in short to endow it with meaning Protagonists who come to experience reality in this expansive way release themselves from self anxiety and alienation In this book Glendening shows how by intermixing past and present fact and fiction neo Victorian narratives with a few instructive exceptions manifest this pattern

Ecosystems of Disturbed Ground L.R. Walker,1999-12-17 As the human population inexorably grows its cumulative impact on the Earth s resources is hard to ignore The ability of the Earth to support more humans is dependent on the ability of humans to manage natural resources wisely Because disturbance alters resource levels effective management requires understanding of the ecology of disturbance This book is the first to take a global approach to the description of both natural and anthropogenic disturbance regimes that physically impact the ground Natural disturbances such as erosion volcanoes wind herbivory flooding and drought plus anthropogenic disturbances such as forestry grazing mining urbanization and military actions are considered Both disturbance impacts and the biotic recovery are addressed as well as the interactions of different types of disturbance Other chapters cover processes that are important to the understanding of disturbance of all

types including soil processes nutrient cycles primary productivity succession animal behaviour and competition Humans react to disturbances by avoiding exacerbating or restoring them or by passing environmental legislation All of these issues are covered in this book Managers need better predictive models and robust data collections that help determine both site specific and generalized responses to disturbance Multiple disturbances have a complex effect on both physical and biotic processes as they interact This book provides a wealth of detail about the process of disturbance and recovery as well as a synthesis of the current state of knowledge about disturbance theory with extensive documentation
