Introduction To Political Economy 5th Edition Balaam:

The Global Political Economy of Raúl Prebisch Matias E. Margulis, 2017-03-16 The Global Political Economy of Raúl Prebisch offers an original analysis of global political economy by examining it through the ideas agency and influence of one of its most important thinkers leaders and personalities Prebisch's ground breaking ideas as an economist the terms of trade thesis and the economic case for state led industrialization changed the world and guided economic policy across the global South As the head of two UN bodies the Economic Commission for Latin America and the Caribbean ECLAC and later the United Nations Conference on Trade and Development UNCTAD he was at the frontline of key North South political struggles for a fairer global distribution of wealth and the regulation of transnational corporations Prebisch increasingly came to view political power not just economic capabilities as pivotal to shaping the institutions and rules of the world economy This book contextualizes his ideas exploring how they were used and their relevance to contemporary issues The neoliberal turn in economics in North America Western Europe and across the global South led to an active discrediting of Prebisch's theories and this volume offers an important corrective reintroducing current and future generations of scholars and students to this important body of work and allowing a richer understanding of past and ongoing political struggles

Grid-locked African Economic Sovereignty Victor Warikandwa, Artwell Nhemachena, 2019-02-06 The emergent so-called Fourth Industrial Revolution is regarded by some as a panacea for bringing about development to Africans This book dismisses this flawed reasoning Surfacing how investors are actually looting and plundering Africa how the industrial internet of things the gig economies digital economies and cryptocurrencies breach African political and economic sovereignty the book pioneers what can be called anticipatory economics which anticipate the future of economies It is argued that the future of Africans does not necessarily require degrowth postgrowth postdevelopment postcapitalism or sharing solidarity economies it requires attention to age-old questions about African ownership and control of their resources Investors have to invest in ensuring that Africans own and control their resources Further it is pointed out that the historical imperial structural creation of forced labour is increasingly morphing into what we call the structural creation of forced leisure which is no less lethal for Africans Because both the structural creation of forced labour and the structural creation of forced leisure are undergirded by transnational neo-imperial plunder theft robbery looting and dispossession of Africans this book goes beyond the simplistic arguments that Euro-America developed due to the industrial revolutions
