Clegg, 2008-02-04 It is by no means a revelation that proteins are not uniformly distributed throughout the cell As a result the idea that protein molecules because of the specificity with which they can engage in interactions with other proteins may be aimed via these interactions at a restricted target is a fundamental one in contemporary molecular life sciences The target may be variously conceived as a specific molecule a group of molecules a structure or a more generic type of intracellular

environment Because the concept of protein targeting is intuitive rather than explicitly defined it has been variously used by different groups of researchers in cell biology biochemistry and molecular biology For those working in the field of intracellular signaling an influential introduction to the topic was the seminal article by Hubbard Cohen TIBS 1993 18 172-177 which was based on the work of Cohen's laboratory on protein phosphatases Subsequently the ideas that they discussed have been further developed and extended by many workers to other key intermediaries in intracellular signaling including protein kinases and a great variety of modulator and adaptor proteins Current Protocols in Molecular Biology Tabs Reprint Frederick M. Ausubel, 2002-04-01 **Cellular Immunology LabFax**, 2014-05-19 LABFAX volumes are purpose designed data reference books for practicing scientists Each book presents the key information for a major subject in one place and so saves hours of searching The authors and editors of each LABFAX volume have searched the original literature for the accurate data they know the subject specialist needs Cellular Immunology Labfax is a detailed compendium of information on the tissues and cells of the immune system cell lines and hybridomas antigens and receptors the major histocompatibility complex soluble immunoregulatory molecules in vivo procedures important features of species used in immunological research and much more The contents of Cellular Immunology Labfax have been carefully chosen to complement the data presented in Immunochemistry Labfax It is therefore the companion volume to this text **Current Protocols in Molecular Biology Tabs** Frederick M. Ausubel, 2003-05-01 **Current Protocols in Protein Science**, 1996

**Current Protocols in Immunology** John E. Coligan, 1991 Current Protocols in Immunology is a three volume looseleaf manual that provides comprehensive coverage of immunological methods from classic to the most cutting edge including antibody detection and preparation assays for functional activities of mouse and human cells involved in immune responses assays for cytokines and their receptors isolation and analysis of proteins and peptides biochemistry of cell activation molecular immunology and animal models of autoimmune and inflammatory diseases Carefully edited step by step protocols replete with material lists expert commentaries and safety and troubleshooting tips ensure that you can duplicate the experimental results in your own laboratory Bimonthly updates which are filed into the looseleaf keep the set current with the latest developments in immunology methods The initial purchase includes one year of updates and then subscribers may renew their annual subscriptions Current Protocols publishes a family of laboratory manuals for bioscientists including Molecular Biology Human Genetics Protein Science Cytometry Cell Biology Neuroscience Pharmacology and Toxicology

**Principles of Immunopharmacology** Frans P. Nijkamp, Michael J. Parnham, 2011-09-01 This textbook provides a unique support in gaining essential knowledge on the immune response its diagnosis and its modification by drugs and chemicals The first section of the book covering a basic introduction to immunology and its relevance for human disease has been updated to accommodate new immunological concepts The second section on immunodiagnosics has been further expanded to describe widely used molecular techniques and is followed by a systematic coverage of drugs affecting the

immune system revised to cover recent developments The book concludes with a chapter on immunotoxicology This third edition continues the unique format dealing with four related topics in a single volume obviating the need to refer to several different textbooks New aids to the reader include a two column format glossaries of technical terms and appendix reference tables The emphasis on illustrations is maintained from the first edition     *Molecular Biology of the Cell* ,1998     **Current Protocols in Bioinformatics** ,2003     **Current Protocols in Molecular Biology** ,1996
