**Laboratory Projects in Physics** Frederick Foreman Good, 2015-06-26 Excerpt from *Laboratory Projects in Physics A Manual of Practical Experiments for Beginners* These experiments have been organized for the purpose of giving concrete expression in the field of physics to the recent tendencies in the teaching of science with respect to aim subject matter and method The physics course in a modern high school should be organized according to the recognized function of education in a democratic society It should include units of study which the masses of boys and girls of high school age are able to pursue with profit It should proceed toward an organization of practical situations activities and phenomena the value of which will be recognized and approved by teachers students parents administrators of education and others who are responsible for the work which boys and girls do in the high school It is intended that these experiments should form part of a physics course which includes class discussions and demonstrations They were devised and used for several years in a beginners course in practical physics They differ from the
