

# Coasting Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the first lecture, *Foundations of Coasting Theory*. These are generalised and give insights on problems for all of the course parts. Some are generalised, while some are specific to the course, the latter contribution to Coasting Theory and the needs of students and their (potential) or (current) teachers. I also used several other sources for additional material, such as Part II course book of *Coasting in Coastal Theory and Oceanography* given by Professor John Wilson, and the first paper given there in *Coasting that is Sustainable* (highlighted in blue given by Professor Tim Gorman). I also included some more about John's 2021 course, *Applied Maths for the Post-Undergraduate*. The last sentence of the notes is based on John Wilson's course notes, "Coastal Erosion Control".

All credits go to those who did my best!
