Inspecting Schools Brian Wilcox,John Gray,1996 During the first half of the 1990s the British government turned inspection into an ambitious instrument of educational policy making Initially it encouraged local education authorities to experiment with inspection in all its forms Growing impatient with the pace of change however a new policy was brought into force after the 1992 General Election Schools were to be inspected on a hitherto unprecedented scale Every primary and secondary school in England and Wales was to undergo a full inspection once every four years At the same time a new agency the Office for Standards in Education OFSTED was set up to organize the new programme Their concern they declared was not merely to hold schools to account but to help them to improve So called failing schools in particular would be identified and put on notice to change The research reported here is one of the very first independent attempts to explore the aftermath of inspection and the ways in which schools do or don't take up inspectors challenges What kinds of recommendations do schools find relatively easy to implement Which factors seem to make a difference Do so called failing schools require special treatment In short has a powerful tool for school improvement been discovered Or is its leverage on change processes in practice more modest The history of school inspections in Britain stretches back over 150 years Despite this lengthy tradition its effects have up till now been simply asserted or taken for granted *Inspecting Schools* offers a compelling account of the limits and possibilities of inspection as a mechanism for school reform BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved The School Librarian School Library
