### **Problems and Solutions in Biological Sequence Analysis**

Mark Borodovsky,Svetlana Ekisheva,2006-09-04 This book is the first of its kind to provide a large collection of bioinformatics problems with accompanying solutions Notably the problem set includes all of the problems offered in Biological Sequence Analysis by Durbin et al Cambridge 1998 widely adopted as a required text for bioinformatics courses at leading universities worldwide Although many of the problems included in Biological Sequence Analysis as exercises for its readers have been repeatedly used for homework and tests no detailed solutions for the problems were available Bioinformatics instructors had therefore frequently expressed a need for fully worked solutions and a larger set of problems for use on courses This book provides just that following the same structure as Biological Sequence Analysis and significantly extending the set of workable problems it will facilitate a better understanding of the contents of the chapters in BSA and will help its readers develop problem solving skills that are vitally important for conducting successful research in the growing field of bioinformatics All of the material has been class tested by the authors at Georgia Tech where the first ever MSc degree program in Bioinformatics was held

**Encyclopedia of the Sciences of Learning** Norbert M. Seel, 2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its na ve theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and

[On the Valuation of Real Options. Necessary Mathematical Tools and Compelling Approaches in Financial Literature](#) Viet Dung Le,2015-09-29 Bachelor Thesis from the year 2015 in the subject Business economics Investment and Finance grade 1.0 European University Viadrina Frankfurt Oder language English abstract When making project decisions under uncertainty the traditional Net Present Value NPV method is a popular choice among practitioners which is also taught in many financial textbooks However there are certain issues with the traditional method that are often overseen resulting in substantial undervaluation of a particular project Thus the powerful tool of real option valuation was introduced to make up for this deficit The purpose of this paper is to show a more comprehensive method for valuing projects under uncertainty namely real options by explaining the necessary mathematical tools and by giving an overview of the compelling approaches in financial literature After explaining the underlying theory and providing a valuation example the paper will attempt to provide reasons to the limited practice of real option analysis in the industry Bei Projektentscheidungen unter Unsicherheit ist die traditionelle Kapitalwertmethode NPV unter Praktikern sehr beliebt weshalb sie in Finanzlehrbüchern vorwiegend berücksichtigt wird Die Probleme in die die traditionelle Methode resultiert werden allerdings häufig übersehen und führen zu einer substantiellen Unterbewertung des jeweiligen Projektes Eine umfassendere Methode zur Bewertung von Projekten unter Unsicherheit die Real Option Analyse soll diesem Defizit entgegenwirken Die hierfür benutzten mathematischen Hilfsmittel werden erläutert und es wird ein Überblick über die methodischen Ansätze aus der Finanzliteratur gegeben Im Anschluss an die Beschreibung der zugrunde liegenden Theorie und ein Bewertungsbeispiel werden Gründe für die eingeschränkte Anwendung der Real Options Analyse in der Privatwirtschaft aufgezeigt

**Analytical Solution for Expected Loss of a Collateralized Loan** Satoshi Yamashita,Toshinao Yoshiba,2010 In this study we derive an explicit solution for the expected loss of a collateralized loan focusing on the negative correlation between default intensity and collateral value Three requirements for the default intensity and the collateral value are imposed First the default event can happen at any time until loan maturity according to an exogenous stochastic process of default intensity Second default intensity and collateral value are negatively correlated Third the default intensity and collateral value are non negative To develop an explicit solution we propose a square root process for default intensity and an affine diffusion process for collateral value Given these settings we derive an explicit solution for the integrand of the expected recovery value within an extended affine model From the derived solution we find the expected recovery value is given by a Stieltjes integral with a measure changed survival probability Authors abstract
