**Entrepreneurial Strategies for Value Creation in Times of Uncertainty** Wojciech Dyduch, 2024-01-01 Entrepreneurial re orientation in the face of crisis Is it worth modifying entrepreneurial strategy Abstract PURPOSE This article aims to determine how companies in the SME sector modify their business strategies in response to changes in the external environment The research focused on modifications to entrepreneurial strategies expressed through the fundamental dimensions of entrepreneurial orientation EO risk taking innovativeness and proactiveness Additionally it identified which types of reactions modifications in strategies lead to the most favorable changes in firm performance The external environment was determined based on the market situation that resulted from the emergence of the COVID 19 pandemic METHODOLOGY This is quantitative research The study utilized data from 126 small printing businesses operating throughout Poland Analyses were conducted on the data that reflected modifications in entrepreneurial behaviors and performance during three periods the pre crisis period the initial phase of the crisis the full lockdown period and the second phase of the crisis the period of easing the restrictions The identification of the behavior types was carried out using cluster analysis FINDINGS The results of the research led to the conclusion that with a change in market conditions companies significantly change their levels of EO In particular the

surveyed companies reduced their levels of EO during the outbreak of the COVID 19 pandemic At the same time this decrease was mainly due to significant decreases in risk taking The levels of EO increased when the conditions improved due to significant increases in innovativeness and proactiveness Moreover the analysis enabled the identification of four types of reactions to the emergence of the crisis as well as three types of reactions to the improvement of the external conditions that resulted from the easing of restrictions and the introduction of anti crisis support measures for businesses Additionally it was demonstrated that the type of reaction had a significant impact on the changes in the performances of the examined companies In particular it was shown that the lowest decline in performance during the initial phase of crisis could be observed in passive enterprises i e those that did not modify their entrepreneurial strategies did not alter their levels of individual dimensions of EO The greatest increase in performance was achieved during the period of easing restrictions by those companies that significantly enhanced their activities across all of the considered dimensions of EO

**IMPLICATIONS**  
The research results provided insights for entrepreneurs in strategic management Specifically they learned about the modifications in entrepreneurial behaviors that could lead to the most favorable and optimal improvements in a firm s performance when market conditions change

**ORIGINALITY AND VALUE**  
The study contributes to the literature concerning reactions to changes in market conditions This innovative approach considers dynamics where the changes themselves are variables In particular this research identifies types of entrepreneurial reactions to market condition changes in terms of dimensions of entrepreneurial orientation Furthermore it provides an answer to how firm performance evolved regarding various reaction types using the example of the printing industry

**Redefining rural entrepreneurship**  
The impact of business ecosystems on the success of rural businesses in Extremadura Spain

**Abstract**  
**PURPOSE** Regarding the growth of public policies fostering rural entrepreneurship the primary objectives of this work involve examining the concept of rural entrepreneurship identifying key aspects that differentiate it from non rural entrepreneurship and assessing the role of the local entrepreneurial ecosystem in supporting the initiation and growth of rural ventures To achieve these goals the study adopts a novel approach by integrating an analysis of rural entrepreneurship features with an exploration of the entrepreneurial ecosystem s impact

**METHODOLOGY**  
After a review of the previous academic literature the characteristics of rural entrepreneurship have been delimited distinguishing it from non rural The research results have been obtained using a questionnaire after a descriptive analysis of the sample and an analysis of the difference in means by contrasting hypotheses using IBM SPSS Statistics 26

**FINDINGS**  
This article explores the factors that contribute to rural entrepreneurship challenging the notion that geographic location is the sole defining characteristic Through the conducted investigation it has been determined that a company s classification as rural is not solely based on its

geographical location in rural areas or involvement in primary sector activities Other aspects such as a strong connection with the local community or the ability to create value are also essential in defining a rural enterprise Additionally it examines how business ecosystems can foster the growth and success of rural entrepreneurship

**IMPLICATIONS** This study provides an analysis of how rural entrepreneurship can drive endogenous development in rural areas It also offers insights for government entities and policymakers to implement effective support measures and strategies in business ecosystems within rural environments This study highlights that the resources found in rural entrepreneurial ecosystems may not be sufficient to support rural entrepreneurship It s important to acknowledge that rural entrepreneurship requires specific resources that may not currently be available in business ecosystems To increase the number of viable rural businesses new resources tailored to rural entrepreneurship must be created leveraging the area s endogenous resources and growth models

**ORIGINALITY AND VALUE** This study examines the distinctive attributes of rural entrepreneurship with a deliberate departure from exclusive emphasis on geographical location or primary economic sector Drawing upon empirical research conducted among a cohort of rural enterprises the analysis reveals that neither physical location nor primary sector affiliation substantially contribute to the establishment of these rural businesses Instead a profound connection to and a heightened sense of belonging within the rural milieu emerge as pivotal determinants Furthermore rural entrepreneurship emerges as a promising avenue for the development of the region offering substantial growth prospects The investigation encompasses a scrutiny of the resources within the rural business ecosystem and their capacity to stimulate rural entrepreneurial activity This emerging focal point represents a novel field of concern for governmental bodies and political institutions operating in rural areas

**Keywords** entrepreneurship rural entrepreneurship business ecosystems rural business success entrepreneurial ecosystem rural development strategies endogenous development rural ventures geographic location impact local community engagement policy implementation for rural areas value creation embeddedness Making of intrapreneurial managers Investigating unethical behavior risk taking and decision making speed as antecedents

**Abstract**

**PURPOSE** The entrepreneurship ethics nexus draws considerable interest from researchers and practitioners with little resolution Our purpose with this paper is to contribute to the debate by shedding light on the relationship between managers attitudes toward unethical behavior and their subsequent entrepreneurial intention EI in an emerging economy context Given the complex and multifaceted interplay between unethical behavior and EI we extend our investigation by including decision making speed and attitude toward risk to explain the relationship further We take a granular approach to facets of unethical behavior to gain deeper insights into the specificity of influences they pose on subsequent behavioral intentions

**METHODOLOGY** Primary data were collected from 214 Kosovan managers employed in companies from different industries Hypothesized relationships were tested by conducting hierarchical regression analyses

**FINDINGS** Our results indicate that managers with higher EI are not necessarily unethical overall We did not find support for the hypothesis that managers with

stronger attitudes toward unethical behavior demonstrate higher entrepreneurial intentions. Focusing on dimensions of unethical behavior, we find that managers who favor bribery are more entrepreneurially inclined. Furthermore, we find that managers who are quick decision makers and risk takers express higher EI. **IMPLICATIONS** Theoretically, we add to the existing body of research on ethics and entrepreneurship by empirically examining the relationship between attitude toward unethical behavior and EI and the viability of the Theory of Planned Behavior as a framework for integrating unethical behavior in entrepreneurship research. Our study affirms the extension of the theoretical and empirical underpinnings concerning ethics and entrepreneurship, contemplating that they are pervasive across contexts. We provide important practical implications for managers, especially in the corporate entrepreneurship and training context. Managers are encouraged to foster an entrepreneurial-friendly environment that abides by ethical standards. Our study also informs policymakers of the importance of formal education on entrepreneurship as a mechanism to enforce ethical awareness in future entrepreneurs and intrapreneurs.

**ORIGINALITY AND VALUE** This study is among the first attempts to test the relationship between unethical behavior and EI in a managerial sample and non-western context. **Keywords:** entrepreneurial intention, unethical behavior, bribery, risk taking, decision making, speed, intrapreneurial managers, entrepreneurship ethics, nexus, hierarchic regression analysis, corporate entrepreneurship, theory of planned behavior, ethical standards, entrepreneurship.

**Entrepreneurial agility and organizational performance of IT firms: A mediated moderation model**

**Abstract**

**PURPOSE** The Information and Communication Technology (ICT) sector is playing an important role in the growth of the world's economy. However, limited knowledge exists concerning the underlying mechanisms and boundary spanning conditions under which entrepreneurial agility (EA) affects the organizational performance (OP) of IT firms. This study draws on the Dynamic Capability Theory (DCT) to examine the effect of entrepreneurial agility (EA) on the organizational performance (OP) of Italian IT firms, with the mediating role of open innovation (OI) and the moderating role of environmental dynamism (ED).

**METHODOLOGY** Employing an explanatory research design and convenience sampling technique via an online survey to gather data from a sample of 411 Italian IT firms, the study tested the formulated hypotheses using the structural equation modeling technique in AMOS statistical software.

**FINDINGS** The results revealed that EA directly and indirectly influences OP of IT firms. Moreover, the mediation analysis unveils that OI plays a complementary partial mediation role in the EA-OP nexus. Finally, ED moderates this focal relationship such that in the presence of high environmental dynamism, the relationship between EA and OP gets stronger compared to low environmental dynamism.

**IMPLICATIONS** The findings imply that IT firms should emphasize adopting agile procedures and structures that allow them to react to new problems and opportunities swiftly by building a culture of innovation through the adoption of OI strategies (inbound, outbound, and coupled) to tap into the broader range of expertise and resources in the business environment. To improve the link between OI and OP, managers should prioritize building relationships with external partners such as customers, suppliers, and academic

institutions IT firms should also prioritize building a diverse and inclusive workforce that can bring diverse perspectives and experiences to the innovation process to enhance their innovation capabilities and create products and services that better meet the needs of customers ORIGINALITY AND VALUE The study s value lies in extending the ongoing scholarly discussion on the nexus between EA and OP by exploring OI as an intermediary mechanism that connects EA OP and ED as a boundary spanning condition that moderates the focal relationship This research highlights the interplay between EA OI ED and OP using the DCT as a theoretical foundation It is the first to examine such interrelationships in the IT sector In addition the study provides new insight for researchers focusing on the information technology IT sector Keywords entrepreneurial agility organizational performance IT firms dynamic capability theory open innovation environmental dynamism mediated moderation model structural equation modeling information and communication technology sector innovation management
