

**Brain Web Quest – Use the Internet
to Answer the following about:
Neuropsychology**

The brain is an incredible bundle of roughly 1 trillion neurons that all work together to enable you to function. Individually or with a study group, you will explore the brain in all its complexity through the internet.

Explain *in your words* the **function, location, and associated processes** of each of the following parts of the brain. In addition, label all parts on the diagrams provided. The purpose of this exercise is to train the brain in interactive and 3D diagrams, so make sure you look at many different websites, answering them all from one may prove frustrating and less meaningful.

I. Lobes of the brain:

Parietal Lobe

Function: processes sensory information that had to do with taste, temperature, and touch.

Location: upper middle portion of the head

Associated Process: contains important sensory receptors

Occipital Lobe

Function: responsible for processing visual information from the eyes

Location: back of head

Associated Process: visual areas, which receive visual information from the opposite visual field

Frontal Lobe

Function: involved in speaking and muscle movements and in making plans judgements

Location: front lobe of the brain

Associated Process: thinking, decision making and planning

Temporal Lobe

Function: contains centers of hearing and memory, processes auditory information from the ears

Location: sides of the brain

Associated Process: auditory areas

II. Structures of the brain

Medulla (Oblongata)

Function: Carries out and regulates life sustaining functions such as breathing, swallowing and heart rate

Location: Lower part of the brain stem

Associated Process: it controls automatic functions including heartbeat, breathing, etc.
