

Risk of GBV for women and girls in CVA programs is mitigated

Objective

PDM surveys and other M&E tools in 2 countries are re-designed with validated indicators\* that detect GBV risk to women and girls in CVA programming

Field-based M&E staff can analyze and synthesize PDM data for GBV risks and use feedback findings to improve CVA programming for women and girls

Evidence concerning the process of GBV risks within CVA programming is produced, including:  
1) List of validated indicators\* that CVA actors can include in their PDM tools to better detect and mitigate GBV risk to women and girls in CVA programming; and  
2) Templates of participatory group discussion guides that CVA actors can use to validate GBV risk indicators to their context

Primary Outcomes

1) Disaggregate PDM data and appraise survey tools in 2 countries to determine:  
a. If current indicators in PDM tools are sufficient to detect GBV risk in CVA programming; and  
b. What other indicators\* can be included to detect and monitor other aspects of GBV risk in CVA programming

2) Host consultative, participatory sessions with two-headed humanitarian M&E staff in 2 countries to:  
a. Discuss gaps in current PDM tools in regards to detecting and monitoring GBV risk; and  
b. Workshop lists of potential indicators\* that can be used for improved monitoring of GBV risk in CVA programming

3) Conduct qualitative participatory group discussions with women and girls in 2 countries to:  
a. Further explore how they experience and perceive risk of and safety from GBV while accessing CVA; and  
b. Validate the lists of potential indicators\* for monitoring GBV risk in CVA programming

Activities

\*These will include context-specific indicators relevant for specific countries; and "global" indicators that may be broadly relevant for CVA actors across multiple contexts

**Governance by Indicators** Kevin Davis,2012-07-05 Indicators and rankings are widely used by governments and organisations to assess the effectiveness efficiency and success of policy decisions This book evaluates the creation of indicators their impact on policy decisions and the implications of their use *Honour Based Crimes and the Law* Mukaddes Gorar,2021-05-10 Honour based violence and abuse manifests itself in different forms and this book offers a comprehensive understanding of this phenomenon This book argues that the limits of honour crimes must be defined more widely so that they include conducts and behaviours that originate from the patriarchal notion of honour such as honour based oppression and breast ironing The book provides a critical analysis and synthesis of the law in England and Wales and in the international human rights sphere The relevant domestic legislation and cases are examined to reflect on whether adequate protection is provided for the victims and potential victims of honour based violence and abuse Since honour based violence is a violation of human rights the relevant international human rights law is examined to illustrate the perception of such crimes in the international arena The effectiveness of any remedy for victims of honour based violence and abuse depends on its capability to change deep rooted behaviours in communities with honour based patriarchal values This book argues that the law does not provide the effective impact required in part due to patriarchal structures and that more efforts should be dedicated to changes in education It is held that there is a need for an educational programme that is especially designed to tackle violence and promote gender equality The book will be essential reading for academics researchers and policy makers working in the areas of Human Rights Law Criminal Law and Gender Studies *Proceedings of the International Conference on Information Technology & Systems (ICITS 2018)* Álvaro Rocha,Teresa Guarda,2018-01-04 This book includes a selection of articles from the 2018 International Conference on Information Technology organizational models and information systems software and systems modeling software systems architectures applications and tools multimedia systems and applications computer networks mobility and pervasive systems intelligent and decision support systems big data analytics and applications human computer interaction ethics computers health informatics and information technologies in education **Gender-Based Violence and Layered Disasters** Nahid Rezwana,Rachel Pain,2022-12-30 This book investigates the widespread and persistent relationship between disasters and gender based violence drawing on new research with victim survivors to show how the two forms of harm constitute layered disasters in particular places intensifying and reproducing one another The evidence is now overwhelming that disasters and gender based violence are closely connected not just in moments of crisis but in the years that follow as the social economic and environmental impacts of disasters play out This book addresses two key gaps in research First it examines what causes the relationship between disasters and gender based violence to be so widespread and so enduring Second it highlights victim survivors own accounts of gender based violence and disasters It does so by presenting findings from original research on cyclones and flooding in

Bangladesh and the UK and a review of global evidence on the Covid 19 pandemic Drawing on feminist theories it conceptualises the coincidence of gender based violence disasters and other aggravating factors in particular places as layered disasters Taking an intersectional approach that emphasises the connections between culture place patriarchy racism poverty settler colonialism environmental degradation and climate change the authors show the significance of gender based violence in creating vulnerability to future disasters Forefronting victim survivors experiences and understandings the book explores the important role of trauma and how those affected go about the process of survival and recovery Understanding disasters as layered casts light on why tackling gender based violence must be a key priority in disaster planning management and recovery The book concludes by exploring critiques of existing formal responses which often ignore or underplay gender based violence The book will be of interest to all those interested in understanding the causes and impacts of disasters as well as scholars and researchers of gender and gender based violence
