**Blender Character Creation for Games and Animation** Darrin Lile, 2019 Learn to use Blender to create your own 3D characters for animation and video games About This Video Build a 3D character model in Blender Bake a normal map in Blender In Detail Ever wanted to create your own 3D characters for games and animations from the first polygon through to the final rigged character This is the opportunity to build your skills by learning through an interactive and engaging course In this course you'll explore all about 3D modeling in Blender You'll begin by creating a base mesh of the character in Blender understanding how to create the head body hands and feet Next from this base mesh you will create the

character's clothes using Blender's sculpt tools to form creases and folds. You will also UV map the character in Blender and get to grips with creating a unified UV map that can be used to develop texture maps in external paint programs such as Krita. You'll even discover the technique of painting textures for hair, eyebrows, and eyelashes. The course will then guide you on how to bake a normal map in Blender to capture high-resolution sculpt details and apply them to a lower-poly model. In later sections, you will rig the character in Blender and adjust the weights so that it deforms credibly during the animation. The course will only focus on open-source software such as Blender and Krita to help you create a character that is ready for animation in Blender and ready to be imported into any 3D game engine such as Unity and Unreal. By the end of this course, you will have learned how to effectively create exciting characters in Blender for games and animations.

Create Game Characters with Blender Darrin Lile, 2019. Use Blender to 3D model, texture, rig, and animate your own game character. About This Video: Easily navigate the Blender interface and gain experience working with Blender's modeling tools. Learn how to texture using a pen tablet for digital painting. Understand how the instructor uses a Wacom Intuos tablet in this course. In Detail: If you want to learn how to create your own game characters in Blender 3D, this course is for you. You'll learn how to model, texture, rig, and animate a character in Blender 3D. Moreover, you'll also discover how to bring the character into Unity and set up a character controller to move it around. For over 2 decades, Blender has been widely adopted in the animation and visual effects industry thanks to its wide range of features. Blender provides an excellent, low-cost way to learn the fundamentals of 3D modeling, texturing, and rendering. In this course, you'll learn how to use Blender's retopology tools, surface tools, and the Grease Pencil to create a low-resolution version of your high-resolution sculpt. You'll bake normal and ambient occlusion maps in Blender from a hi-res sculpt to a low-poly mesh. You'll then import these texture maps into Unity and test them on your character in game. The course also takes you through some of the unique issues in UV mapping a character in Blender and guides you in using the UV mapping tools to create an organized UV map that can be exported to external paint programs like Photoshop or GIMP for texturing. You'll even explore the texture painting tools in Blender and use them to create texture maps for the character. As you advance, you'll get to grips with using the Blender Rigify add-on to create a basic rig for your game character, prepare your character for rigging, and generate the base rig. Next, you'll understand how to generate the control objects of the rig and how various controls can be used in animation. You'll then discover how you can adjust the weights of your character in Blender using vertex groups and parent the character's war hammer and shield to the rig. The course will also help you get well-versed with the basics of creating animation cycles for a game character. You'll use Blender's Graph Editor and Dope Sheet to animate the Idle and Run animations and create a Jump Pose. Finally, moving to Unity, you'll write the code to get your character running and jumping.
