The Knowledge Capital of Nations Eric A. Hanushek, Ludger Woessmann, 2023-08-15 A rigorous pathbreaking analysis demonstrating that a country's prosperity is directly related in the long run to the skills of its population In this book Eric Hanushek and Ludger Woessmann make a simple central claim developed with rigorous theoretical and empirical support knowledge is the key to a country's development Of course every country acknowledges the importance of developing human capital but Hanushek and Woessmann argue that message has become distorted with politicians and researchers concentrating not on valued skills but on proxies for them The common focus is on school attainment although time in school provides a very misleading picture of how skills enter into development Hanushek and Woessmann contend that the cognitive skills of the population which they term the knowledge capital of a nation are essential to long run prosperity Hanushek and Woessmann subject their hypotheses about the relationship between cognitive skills as consistently measured by international student assessments and economic growth to a series of tests including alternate specifications different subsets of countries and econometric analysis of causal interpretations They find that their main results are remarkably robust and equally applicable to developing and developed countries They demonstrate for example that the Latin American growth puzzle and the East Asian miracle can be explained by these regions knowledge capital Turning to the policy implications of their argument they call for an education system that develops effective accountability promotes choice and competition and provides direct rewards for good performance
