Nowak, 2000 We learn by doing We learn mathematics by doing problems And we learn more mathematics by doing more problems This is the sequel to Problems in Mathematical Analysis I Volume 4 in the Student Mathematical Library series If you want to hone your understanding of continuous and differentiable functions this book contains hundreds of problems to help you do so The emphasis here is on real functions of a single variable The book is mainly geared toward students studying the basic principles of analysis However given its selection of problems organization and level it would be an ideal choice for tutorial or problem solving seminars particularly those geared toward the Putnam exam It is also suitable for self study The presentation of the material is designed to help student comprehension to encourage them to ask their own questions and to start research The collection of problems will also help teachers who wish to incorporate problems into their lectures The problems are grouped into sections according to the methods of solution Solutions for the problems are provided

Selected Problems in Real Analysis B. M. Makarov, 1992 This book is intended for

students wishing to deepen their knowledge of mathematical analysis and for those teaching courses in this area It differs from other problem books in the greater difficulty of the problems some of which are well known theorems in analysis Nonetheless no special preparation is required to solve the majority of the problems Brief but detailed solutions to most of the problems are given in the second part of the book This book is unique in that the authors have aimed to systematize a range of problems that are found in sources that are almost inaccessible especially to students and in mathematical folklore
