Rhetorical Crossover Cedric Burrows, 2020-10-27 In music crossover means that a song has moved beyond its original genre and audience into the general social consciousness Rhetorical Crossover uses the same concept to theorize how the black rhetorical presence has moved in mainstream spaces in an era where African Americans were becoming more visible in white culture Cedric Burrows argues that when black rhetoric moves into the dominant culture white audiences appear welcoming to African Americans as long as they present an acceptable form of blackness for white tastes The predominant culture has always constructed coded narratives on how the black rhetorical presence should appear and behave when in majority spaces In response African Americans developed their own narratives

that revise and reinvent mainstream narratives while also reaffirming their humanity Using an interdisciplinary model built from music education film and social movement studies Rhetorical Crossover details the dueling narratives about African Americans that percolate throughout the United States

Current Issues and Enduring Questions Fourth Edition Hugo Bedau, 1996 *Language, Feeling, and the Brain* Daniel Shanahan, 2017-09-08 Linguistic theory since the Cognitive Revolution has followed one of the premises of that revolution by largely sidelining the issue of emotions and concentrating on those aspects of language that are more strictly cognitive However during the last ten years research in cognitive science especially in neuropsychology has begun to fill in the gaps left by the exclusion of emotions from cognitive research The work of those like Oatley Zajonc Damasio and LeDoux to name a few has demonstrated both that it is possible to construct models of how emotions play into the workings of the psyche and that they are necessary in giving us a balanced view of the human mind *Language Feeling and the Brain* attempts to apply the fruits of this new research in emotion to our understanding of language itself Building on Karl Pribram's integrated model of emotions and motivations the book takes an eclectic approach to explaining how emotions contribute to the nature of language drawing on research done in neuropsychology philosophy cognitive linguistics anthropology and related fields Its aim is to construct a propositional model for how the emotions may have contributed to the emergence of symbolic formation most especially in the forms of gesture and speech and how identifying that emotional influence sheds new light on everything we have had to say about language itself from lexis and grammar to culture and literature

Handbook of Gender Research in Psychology Joan C. Chrisler, Donald R. McCreary, 2010-03-12 Donald R. McCreary and Joan C. Chrisler. The Development of Gender Studies in Psychology. Studies of sex differences are as old as the field of psychology, and they have been conducted in every subfield of the discipline. There are probably many reasons for the popularity of these studies, but three reasons seem to be most prominent. First, social psychological studies of person perception show that sex is especially salient in social groups. It is the first thing people notice about others, and it is one of the things we remember best. Fiske, Haslam, Stangor, Lynch, Duan, Glass, 1992. For example, people may not remember who uttered a witty remark, but they are likely to remember whether the quip came from a woman or a man. Second, many people hold firm beliefs that aspects of physiology suit men and women for particular social roles. Men's greater upper body strength makes them better candidates for manual labor, and their greater height gives the impression that they would make good leaders, i.e., people we look up to. Women's reproductive capacity and the caretaking tasks, e.g., breastfeeding, baby minding, that accompany it make them seem suitable for other roles that require gentleness and nurturance. Third, the logic that underlies hypothesis testing in the sciences is focused on difference. Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ.

Leadership and the Ethics of Influence Terry L. Price, 2020-03-02 How do leaders influence others? Although they sometimes appeal directly to good reasons which we associate with rational persuasion, leaders also use guilt, pressure, flattery, bullying, and rewards and punishment all to get the behaviors that they want. Even when leaders refrain from outright lying, they are nevertheless known to practice something approaching, perhaps reaching the level of manipulation. Influence therefore presents a serious ethical problem across leadership contexts. *Leadership and the Ethics of Influence* argues that influence puts leaders at risk of using people. It is generally disrespectful of autonomy to figure out what makes people tick in an effort to handle them. In contrast with physical force, influence works through agency, not around it. Despite this feature of influence, and to a large extent because of it, the everyday influence associated with leadership is often morally troublesome. What matters morally is not only whether agency is bypassed or overridden, but also who is ultimately in control. This book uses philosophy and leadership studies to show how leaders across different contexts can be justified in getting followers to do things. Connecting moral theory to leadership theory, and especially to charismatic leadership, authentic leadership,

transforming leadership and ethical leadership this book is essential reading for leadership scholars students and practitioners **Directions** ,1980 *Book Review Digest* ,1997 *FID News Bulletin* International Federation for Documentation.
