Explores the latest applications of AI and machine learning to the knitting process.

Applications from Engineering with MATLAB Concepts Jan Valdman, 2016-07-07. The book presents a collection of MATLAB-based chapters of various engineering backgrounds. Instead of giving an exhausting amount of technical details, authors were rather advised to explain relations of their problems to actual MATLAB concepts. So whenever possible, download links to functioning MATLAB codes were added, and a potential reader can do own testing. Authors are typically scientists with interests in modeling in MATLAB. Chapters include image and signal processing, mechanics, and dynamics models, and data identification in biology, fuzzy logic, discrete event systems, and data acquisition systems.
