method of load calculation of electrical drives of rolling mills - Feb 15 2023

may 1 2018 an improved calculation method for rolling pressure and load torque of electrical drive engine is suggested further this method considers peculiar strain of product in high deformation zones and its accelerated motion in reverse mode improved analytical dependences for rolling pressure and load torque of electrical drive are reviewed

the calculation of rolling force innova technology - May 06 2022

mar 26 2020 yield stress strain hardening factor \times strain rate hardening factor \times thermal softening factor in the rolling of aluminium it is strain hardening which typically dominates at low temperatures on the other hand strain rate and temperature are more important in hot rolling
