Management Accounting ,1924 **Improving Governments' Role in the Promotion of Environmental Managerial Accounting** United Nations. Division for Sustainable Development,2000 Recent years have seen increasing pressures and incentives for the adoption of cleaner production processes and pollution prevention measures by industry emerging from both inside and outside of commerce Internally the driver is to reduce the producers costs associated with waste and compliance with regulations Externally the corporate environmental performance

is increasingly scrutinised by investors regulatory bodies and the public at large Some enterprises are reviewing and changing their management procedures in order to measure more accurately the costs of environmental impacts and the benefit of environmental protection With increasingly tough environmental protection policies come steadily increasing business costs Conventional managerial accounting systems do not adequately identify these costs thereby complicating or preventing actions to reduce them Environmental managerial accounting EMA covers a variety of techniques for identifying and measuring the full range of environmental costs While managerial accounting systems are traditionally viewed as matters internal to a business the potential public benefits that can result from their widespread adoption by corporations provide an incentive for an active government role in promoting such systems This report presents the considerations from a series of United Nations sponsored expert meetings on how governments might promote and advance EMA
