14th International Conference on Theory and Application of Fuzzy Systems and Soft Computing - ICAFS-2020

Rafik A. Aliev, Janusz Kacprzyk, Witold Pedrycz, Mo Jamshidi, Mustafa Babanlı, Fahreddin M. Sadikoglu, 2021-01-04 This book presents the proceedings of the 14th International Conference on Applications of Fuzzy Systems Soft Computing and Artificial Intelligence Tools ICAFS 2020 held in Budva Montenegro on August 27 28 2020 It includes contributions from diverse areas of fuzzy systems soft computing AI tools such as uncertain computation decision making under imperfect information deep learning and others The topics of the papers include theory and application of soft computing neuro fuzzy technology intelligent control deep learning machine learning fuzzy logic in data analytics evolutionary computing fuzzy logic and artificial intelligence in engineering social sciences business economics material sciences and others *Exploratory Data Analysis* Leandro Nunes de Castro, 2025-11-07 This book is a comprehensive guide to exploratory data analysis EDA providing readers with the tools techniques and knowledge needed to conduct effective and thorough data exploration Throughout the seven main chapters this book details various aspects of EDA from data description and preprocessing to visualization storytelling and dashboard design We will explore real world datasets uncovering hidden patterns and gaining insights along the way This book is filled with illustrations using practical examples Python codes and different types of exercises designed to reinforce the concepts and processes discussed Whether you are a student just starting out in the field of data science a senior professional looking to improve your skills or a curious individual interested in the power of data this book is for you

Advances in Information and Communication Networks Kohei Arai, Supriya Kapoor, Rahul

Bhatia, 2018-12-26 The book gathering the proceedings of the Future of Information and Communication Conference FICC 2018 is a remarkable collection of chapters covering a wide range of topics in areas of information and communication technologies and their applications to the real world It includes 104 papers and posters by pioneering academic researchers scientists industrial engineers and students from all around the world which contribute to our understanding of relevant trends of current research on communication data science ambient intelligence networking computing security and Internet of Things This book collects state of the art chapters on all aspects of information science and communication technologies from classical to intelligent and covers both theory and applications of the latest technologies and methodologies Presenting state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research this book is an interesting and useful resource The chapter Emergency Departments is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com) *Computational Intelligent Security in Wireless Communications* Suhel Ahmed Khan, Rajeev Kumar, Omprakash Kaiwartya, Raees Ahmad Khan, Mohammad Faisal, 2023-03-21 Wireless network security research is multidisciplinary in nature including data analysis economics mathematics forensics information technology and computer science This text covers cutting edge research in computational

intelligence systems from diverse fields on the complex subject of wireless communication security It discusses important topics including computational intelligence in wireless network and communications artificial intelligence and wireless communication security security risk scenarios in communications security resilience metrics and their measurements data analytics of cyber crimes modeling of wireless communication security risks advances in cyber threats and computer crimes adaptive and learning techniques for secure estimation and control decision support systems fault tolerance and diagnosis cloud forensics and information systems and intelligent information retrieval The book Discusses computational algorithms for system modeling and optimization in security perspective Focuses on error prediction and fault diagnosis through intelligent information retrieval via wireless technologies Explores a group of practical research problems where security experts can help develop new data driven methodologies Covers application on artificial intelligence and wireless communication security risk perspective The text is primarily written for senior undergraduate graduate students and researchers in the fields of electrical engineering electronics and communication engineering and computer engineering The text comprehensively discusses wide range of wireless communication techniques with emerging computational intelligent trends to help readers understand the role of wireless technologies in applications touching various spheres of human life with the help of hesitant fuzzy sets based computational modeling It will be a valuable resource for senior undergraduate graduate students and researchers in the fields of electrical engineering electronics and communication engineering and computer engineering

Nature-Inspired Computing: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2016-07-26 As technology continues to become more sophisticated mimicking natural processes and phenomena also becomes more of a reality Continued research in the field of natural computing enables an understanding of the world around us in addition to opportunities for man made computing to mirror the natural processes and systems that have existed for centuries Nature Inspired Computing Concepts Methodologies Tools and Applications takes an interdisciplinary approach to the topic of natural computing including emerging technologies being developed for the purpose of simulating natural phenomena applications across industries and the future outlook of biologically and nature inspired technologies Emphasizing critical research in a comprehensive multi volume set this publication is designed for use by IT professionals researchers and graduate students studying intelligent computing

Innovations in Cyber Physical Systems Jawar Singh, Sudhir Kumar, Umakanta Choudhury, 2021-09-09 The book presents a collection of peer reviewed articles from the International Conference on Innovations in Cyber Physical Systems ICICPS 2020 The conference provided opportunities for the presentation of new research results and discussion about them It was also an opportunity to generation of new ideas in all CPS aspects including theory tools applications systems test beds and field deployments The range of topics explored is wide and covers security control optimization machine learning game theory mechanism design mobile and cloud computing model based design verification data mining analytics signal processing and human in the loop shared or
