and political transformation of Dalmatia between c 500 and c 900 AD The collapse of Dalmatia in the early seventh century is traditionally ascribed to the Slav migrations However more recent scholarship has started to challenge this theory looking instead for alternative explanations for the cultural and social changes that took place during this period Drawing on both written and material sources this study utilizes recent archaeological and historical research to provide a new historical narrative of this little known period in the history of the Balkan peninsula This book will appeal to scholars and students interested in Byzantine and early medieval Europe the Balkans and the Mediterranean It is important reading for both historians and archaeologists

Foi et culture en Irak au XIe siècle Khalil Samir, 1996. The 10th century was an age of enormous intellectual vitality in the lands of Islam, stimulated by the assimilation of Greek thought. Notable among the scholars and writers of the period were Syrian Christians, bi- or trilingual, whose contributions in medicine and philosophy, especially those of Elias, bishop of Nisibis (975-1046), to whose life and work these articles are devoted, were seminal. Elias was educated in this tradition of Greek science and scholarship as well as in Christian and Muslim theology and came to be recognized as outstanding for the depth of his learning. A particular impression was made by his debates with the vizier Abu l Qasim Ibn Ali al Maghribi in 1027. In the studies gathered here, Professor Samir has made a major contribution to our understanding of this important period of medieval intellectual history.
