

# OpenWrt Development Guide

This document describes the development process for OpenWrt. It covers the build system, the package management system, and the various tools and utilities used in the development process.

## OpenWrt Development Environment

OpenWrt development is done in a collection of subdirectories, each with its own set of files and directories. The main directory is `openwrt`, which contains the build system, the package management system, and the various tools and utilities used in the development process. The subdirectories are: `bin`, `build`, `feeds`, `image`, `lib`, and `rootfs`. Each subdirectory has its own set of files and directories, and they are all interconnected.

Figure 1: OpenWrt directory structure. The root directory is the `openwrt` directory, which contains the build system, the package management system, and the various tools and utilities used in the development process.

- `bin`: contains all the binaries used in the development process.
- `build`: contains all the build system files, including the `Makefile`, the `build` script, and the various tools and utilities used in the development process.
- `image`: contains all the image files, including the `image` script, the `image` Makefile, and the various tools and utilities used in the development process.
- `lib`: contains all the library files, including the `lib` script, the `lib` Makefile, and the various tools and utilities used in the development process.
- `rootfs`: contains all the root filesystem files, including the `rootfs` script, the `rootfs` Makefile, and the various tools and utilities used in the development process.
