**Extreme Programming Refactored** Don Rosenberg, Matt Stephens, 2008-01-01 Extreme Programming Refactored The Case Against XP featuring Songs of the Extremos takes a satirical look at the increasingly hyped extreme programming XP methodology It explores some quite astonishing Extremo quotes that have typified the XP approach quotes such as XPers are not afraid of oral documentation Schedule is the customer s problem Dependencies between requirements are more a matter of fear than reality and Concentration is the enemy In between the chuckles though there is a serious analysis of XP s many flaws The authors also examine C3 the first XP project whose team most of whom went on to get XP book deals shortly before C3 s cancellation described themselves as the best team on the face of the Earth In a later chapter the authors also note that one problem which can affect pair programmers is overconfidence or is that eXcessive courage The authors examine whether the problems that led to C3 s inexplicable cancellation could also afflict present day XP projects In the final chapter Refactoring XP Matt and Doug suggest some ways of achieving the agile goals of XP using some XP practices used in moderation combined with other less risk laden methods

**Agile Processes in Software Engineering and Extreme Programming** Pekka Abrahamsson, Michele Marchesi, Frank Maurer, 2009-05-19 The field of software engineering is characterized by speed and turbulence in many regards While new ideas are proposed almost on a yearly basis very few of them live for a decade or a longer Lightweight software development methods were a new idea in the latter part of the 1990s Now ten years later they are better known as agile software development methods and an active community driven by practitioners has formed around the new way of thinking Agile software development is currently being embraced by the research community as well As a sign of increased research activity most research oriented conferences have an agile software development track included in the conference program The XP conference series established in 2000 was the first conference dedicated to agile processes in software engineering The idea of the conference

is to offer a unique setting for advancing the state of the art in research and practice of agile processes This year s conference was the tenth consecutive edition of this international event Due to the diverse nature of different activities during the conference XP is claimed to be more of an experience rather than a regular conference It offers several different ways to interact and strives to create a truly collaborative environment where new ideas and exciting findings can be presented and shared This is clearly visible from this year s program as well
