

Module 1 – Drawing Set Organization

1.1 SHEET IDENTIFICATION

The sheet identification format typically used in traditional construction drawing sets uses a consistent set of sheet numbers, drawing numbers, and titles distributed across drawings in a drawing set regarding sheets. These techniques have also provided an opportunity to expand the use of the sheet identifier. Accordingly, the sheet identification format is a key part of V8i®.

1.1.1 Standard Sheet Identification

The sheet identification format is applicable to both manual and CAD drawings. It is consistent with standards set forth throughout the entire range of project types. The V8i sheet identification format standard uses consistent sheet numbering as follows:

- 1. The **drawing designator** – consisting of one alphanumeric character and a hyphen or two alphanumeric characters.
- 2. The **sheet type designator** – consisting of one numerical character.
- 3. The **sheet sequence number** – consisting of two numerical characters.

The use of the drawing designator identifies the sheet as a member of a project. A sheet type designator identifies the type information on the sheet is followed by the sheet sequence number.

Regarding the use of sheet numbers in project delivery, V8i offers two levels of sheet identification. Below is a list of a combination of the sheet numbers used to set the context of the presentation of the drawings. Level 1 offers the simplest presentation format and would be suitable for all but the most complex projects. Level 2 provides guidance for complex or special types of projects. Refer to [V8i Standard 2 – Drawing Designator V8i context 2](#) for examples of the two levels of sheet identification.

Note that the hyphen in the Level 1 drawing designator is a required sheet hyphen for the presence of the second character. The hyphen is optional rather than a required part due to the use of the “00” as a character. The hyphen, accordingly, is implemented for users to replace the hyphen when appropriate regarding complex drawing sheet hyphenation schemes.

1.1.2 Drawing Designator

The first component of the sheet identification format, the drawing designator, is based on the numbering system of architectural drawing designators, using either a single alphanumeric character and a hyphen or two alphanumeric characters (Level 1).

The drawing designator denotes the category of subject matter contained on the sheet in the drawing set. It must appear:
