What's So Smart About Intelligence? John William Sewell,2016-01-01 This book is about students finding and reaching their potential It is definitely not about everyone becoming an academic Or about everyone going to university It is about each person giving themselves the opportunity to choose So many students end up doing trades or taking sales jobs not because that is what they want but because that is all they think they can accomplish We need great trades people great sales assistants great workers in all kinds of areas of employment if you choose such a position rather than feel that you have to do it because you have no other choice then you have a much better chance of being successful in that employment and ultimately doing a great job at it My desire is To encourage all learners to achieve their best with smart and hard work To motivate the love of learning To argue against the widespread and long held view that intelligence is fixed unchanged and that it can be measured To present arguments that intelligence is changeable modifiable and how it is impacted and influenced by many varying factors that can impede learning and academic outcomes To demonstrate that through smart hard work and perseverance learners can improve achieve succeed and above all love learning
