The Game's Afoot! Game Theory in Myth and Paradox Alexander Mehlmann, 2000 It all started with von Neumann and Morgenstern half a century ago Their Theory of Games and Economic Behavior gave birth to a whole new area of mathematics concerned with the formal problems of rational decision as experienced by multiple agents Now game theory is all around us making its way even into regular conversations In the present book Mehlmann presents mathematical foundations and concepts illustrated via social quandaries mock political battles evolutionary confrontations economic struggles and literary conflict Most of the standard models the prisoners dilemma the arms race evolution duels the game of chicken etc are here Many non standard examples are also here the Legend of Faust shootouts in the movies the Madness of Odysseus to name a few The author uses familiar formulas fables and paradoxes to guide readers through what he calls the hall of mirrors of strategic decision making His light hearted excursion into the world of strategic calculation shows that even deep insights into the nature of strategic thought can be elucidated by games puzzles and diversions Originally written in German and published by Vieweg Verlag this AMS edition is a translation tailored for the English speaking reader It offers an intriguing look at myths and paradoxes through the lens of game theory bringing the mathematics into sharper focus at the

same time This book is a must for those who wish to consider game theory from a different perspective one that embraces science literature and real life conflict The Game s Afoot would make an excellent book for an undergraduate course in game theory It can also be used for independent study or as supplementary course reading The connections to literature films and everyday life also make it highly suitable as a text for a challenging course for non majors Its refreshing style and amusing combination of game theoretic analysis and cultural issues even make it appealing as recreational reading *The Art of Strategy* Avinash K.
