An Introduction to Computer Science Using C Roger Eggen, Maurice Eggen, 1993. This text is intended for an introductory course in computer science. The authors present a conceptual introduction to key concepts and methodologies of computer science. C is the language of instruction and is integrated only as needed to highlight points and demonstrate concepts throughout the text. In addition to numerous exercises, laboratory activities are incorporated into each Chapter after Chapter 1 leading students through an experimental approach to the concepts and techniques covered in the text.

Working Classes Rick Decker, Stuart Hirshfield, 1996. Decker and Hirshfield's Working Classes applies the C programming language to the study of data structures and abstract data types. The authors organize their discussion of abstract data types according to their structural restrictions beginning with highly structured lists, stacks and queues and progressing through trees and directed graphs to unstructured sets. Chapter 10 examines the problem of regenerating text from a large sample using a real computer compiler system to demonstrate how time and space constraints arise from the choice of data structure. The book teaches by example with more than 350 exercises provided and most chapters conclude with an optional Explorations section that covers topics of special interest.
