Events that marked such as test-20, Padma and other test these propellants were also developed in test as part of the indigenous programme. The Satellite Launch Vehicle (SLV-3) conceived at the early committee, was fitted with four stage motor filled with solid propellant made in native test process. These facilities, including critical process equipment, have come up as a result of ISRO's indigenous efforts. The test plant structure established further supported to produce large propellant grains to meet the needs of the Polar Satellite Launch Vehicle (PSLV).
