XBee Cellular 3G development kit provides OEMs with a simple, quick way to integrate cellular connectivity into their devices.

Digi XBee Cellular 3G embedded modems provide a simple path to 3G (HSPA/GSM) with 2G fallback connectivity for OEMs with worldwide deployments. This modem is FCC/ IC, PTCRB, and AT&T certified which completely eliminates the cost, complexity, and risk involved in the certification process.

The modem is programmable, with support for custom MicroPython applications running directly onboard, allowing developers to add unique features to their devices and eliminating the need for an external microcontroller in certain use-cases. It includes the full suite of standard Digi XBee API frames and AT commands, so existing customers can simply drop this modem into their existing designs to instantly achieve 3G cellular integration, without the pain and hassle of doing a complete re-design.

Starting with simple examples, we provide step-by-step guidance as you assemble the kit components to create reliable, low-power cellular communications for OEM devices like sensors and control/monitoring systems. The kit will include 6 months of free cellular data service, pre-activated and ready to go right out of the box, allowing developers to immediately focus on their primary goal; developing great products without the hassle of setting up data plan, ordering and provisioning a SIM from the carrier.

## The Kit Includes:

- ✓ 1 Digi XBee Cellular 3G embedded modem
- ✓ 1 Digi XBee Development Board
- ✓ 1 SIM
- ✓ 6 months of free cellular service – 5MB/month
- ✓ Antennas and power supply
