Bioprocessing Technologies in Biorefinery for Sustainable Production of Fuels, Chemicals, and Polymers Shang-Tian Yang, Hesham El-Ensashy, Nuttha Thongchul, 2013-05-24 Sets the stage for large scale production of biofuels and bio based chemicals In response to diminishing supplies as well as the environmental hazards posed by fossil fuels and petrochemicals interest and demand for green sustainable biofuels and bio based chemicals are soaring Biomass may be the solution It is an abundant carbon neutral renewable feedstock that can be used for the production of fuels and chemicals Currently biorefineries use corn soybeans and sugarcane for bioethanol and biodiesel production however there are many challenges facing biorefineries preventing biomass from reaching its full potential This book provides a comprehensive review of bioprocessing technologies that use lignocellulosic biomass for the production of biofuels biochemicals and biopolymers It begins with an overview of integrated biorefineries Next it covers Biomass feedstocks including sugar starch oil and energy crops as well as microalgae Pretreatment technologies for lignocellulosic biomass Hydrolytic enzymes used in biorefineries for the hydrolysis of starch and lignocelluloses Bioconversion technologies for current and future biofuels such as ethanol biodiesel butanol hydrogen and biogas Specialty chemicals building block chemicals and biopolymers produced via fermentation Phytochemicals and functional food ingredients extracted from plant materials All the chapters have been written and edited by leading experts in bioprocessing and biorefining technologies Contributions are based on a thorough review of the literature as well as the authors firsthand experience developing and working with bioprocessing technologies By setting forth the current state of the technology and pointing to promising new directions in research Bioprocessing Technologies in Biorefinery for Sustainable Production of Fuels Chemicals and Polymers will enable readers to move towards large scale sustainable and economical production of biofuels and bio based chemicals Bio-Based Composites for High-Performance Materials Wirasak Smitthipong, Rungsima Chollakup, Michel Nardin, 2014-10-24 Since synthetic plastics derived from fossil resources are mostly non biodegradable many academic and industrial researchers have shifted their attention toward bio based materials which are more eco friendly Bio Based Composites for High Performance Materials From Strategy to Industrial Application provides an overview of the state of art in bi **Agricultural Biotechnology** G. J. Persley, Reginald MacIntyre, 2002 This book through its overview chapter and 12 country studies provides useful information on the evolving biotechnological research in Asia Africa and Latin America The emphasis is on the potential biotechnologies hold for agriculture in developing countries The reports vary in depth of coverage but all combine to show the urgent need that exists for public and private sector investment to ensure that all countries share in the benefits of modern biotechnologies while minimizing any unintended effects The book contains a subject index **Bioethanol** Marco Aurelio Pinheiro Lima, 2012-02-01 Recent studies have shown strong evidence of human activity impact on the climate of the planet Higher temperatures and intensification of extreme weather events such as hurricanes are among the consequences This

scenario opens up several possibilities for what is now called green or low carbon economy We are talking about creating new businesses and industries geared to develop products and services with low consumption of natural resources and reduced greenhouse gases emission Within this category of business biofuels is a highlight and the central theme of this book The first section presents some research results for first generation ethanol production from starch and sugar raw materials Chapters in the second section present results on some efforts around the world to develop an efficient technology for producing second generation ethanol from different types of lignocellulosic materials While these production technologies are being developed different uses for ethanol could also be studied The chapter in the third section points to the use of hydrogen in fuel cells where this hydrogen could be produced from ethanol

Agricultural Innovation in Developing East Asia Riikka Rajalahti,2021-12-29 Agricultural innovation has played a critical role in the economic transformation of developing East Asian countries over the past half century The Green Revolution in the form of modern seed varieties chemical fertilizers pesticides and modern machinery has contributed to increased crop yields and farm incomes and decreased poverty across the region Although policy makers traditional focus on expanding and intensifying agricultural production has brought many benefits the focus on productivity has come at a rising cost The environmental sustainability of agricultural production is increasingly under threat Moreover as countries in the region have become more urbanized and demand for processed foods has risen inadequate food safety systems and related food safety hazards have created a new form of food insecurity As detailed in *Agricultural Innovation in Developing East Asia Productivity Safety and Sustainability* a new generation of innovation in agriculture has the potential to address the challenges of productivity sustainability and food safety to deliver a triple win To make the most of this promising wave of agricultural innovations policy makers in the region will need to act to strengthen countries agricultural innovation systems This effort will require a cross cutting approach including policy and institutional reforms improved governance of countries agri food systems and efforts to build farmers and firms capacities to adopt new technologies and to innovate

Witthayāsān Kasētsārt ,2011-05 *Engineering Materials and Application* Tan Jin,2013-01-25 Selected peer reviewed papers from the 2012 International Conference on Engineering Materials ICEM 2012 December 30 31 2012 Singapore Singapore *Agricultural Innovation Systems* World Bank,2012-02-21 Managing the ability of agriculture to meet rising global demand and to respond to the changes and opportunities will require good policy sustained investments and innovation not business as usual Investments in public Research and Development extension education and their links with one another have elicited high returns and pro poor growth but these investments alone will not elicit innovation at the pace or on the scale required by the intensifying and proliferating challenges confronting agriculture Experience indicates that aside from a strong capacity in Research and Development the ability to innovate is often related to collective action coordination the exchange of knowledge among diverse actors the incentives and resources available to form partnerships and develop businesses and conditions that make

it possible for farmers or entrepreneurs to use the innovations While consensus is developing about what is meant by innovation and innovation system no detailed blueprint exists for making agricultural innovation happen at a given time in a given place for a given result The AIS approach that looks at these multiple conditions and relationships that promote innovation in agriculture has however moved from a concept to a sub discipline with principles of analysis and action AIS investments must be specific to the context responding to the stage of development in a particular country and agricultural sector especially the AIS This sourcebook contributes to identifying designing and implementing the investments approaches and complementary interventions that appear most likely to strengthen AIS and to promote agricultural innovation and equitable growth It emphasizes the lessons learned benefits and impacts implementation issues and prospects for replicating or expanding successful practices The information in this sourcebook derives from approaches that have been tested at different scales in different contexts It reflects the experiences and evolving understanding of numerous individuals and organizations concerned with agricultural innovation including the World Bank This information is targeted to the key operational staff in international and regional development agencies and national governments who design and implement lending projects and to the practitioners who design thematic programs and technical assistance packages The sourcebook can also be an important resource for the research community and nongovernmental organizations NGOs
