problems Includes four case studies from past AICHE competitions *Macroeconomic Analysis of Environmental Policy*
Ekko Ierland,1993 Hardbound The field of environmental economics has been developing quickly over the last few decades
Although environmental awareness is increasing day by day and improvements in environmental policy are taking place it
will take a long time to solve these problems in a satisfying way This book deals with both the theory of environmental
economics and a number of empirical applications of it It analyses the causes and possible solutions for environmental
problems and looks at the possible future development of the economy The book also focuses on global warming and climatic
change as well as presenting an optimization study of the economic aspects of transboundary air pollution in Europe This
volume will be of great interest to environmental scientists worldwide aiming to contribute to a better understanding of the
economic environmental interactions and stimulate an active environmental policy **Journal of Economic Literature**
,2006 **Spatial Search** Gunther Maier,1995-08-18 The book provides the first comprehensive discussion of optimal search
theory in a spatial context By treating the alternatives of a search problem as spatially distributed the standard structure of
an optimal search model is altered considerably The book discusses the basic structure of this spatial search problem and
demonstrates that it falls into a class of highly complex problems After a brief discussion of potential simplifications and
heuristic solutions it applies the microeconomic concept of spatial search to selected aspects of spatial economics like spatial
price theory the theory of market areas and agglomeration theory It can be demonstrated that a spatial search based theory
can capture a number of well known phenomena e g the transition from a dispersed to an agglomerated locational pattern
