## **Chapter 17 Capital Structure Tradeoffs And Theory:**

*Corporate Finance* Aswath Damodaran, 1997 A text with a thoroughly integrated applications orientation revolving around the philosophy that companies need to know how to finance organizations in order to reach optimal capital structure Recognizing that every investment decision involves choosing the right amount of debt and equity the text suggests readers look at data and ask What is relevant Why is this detail important How does it answer the question **Modern Corporate Finance, Investments and Taxation** Peter Brusov, Tatiana Filatova, Natali Orekhova, Mukhadin Eskindarov, 2015-06-02 This monograph is devoted to the modern theory of capital cost and capital structure and its application to the real economy In particular it presents a possible explanation to the causes of global financial crisis The authors of the book modify the theory of Nobel Prize winners Modigliani and Miller to describe an alternative theory of capital cost and capital structure that can be applied to corporations with arbitrary lifetime and investment projects with arbitrary duration The authors illustrate their theory with examples from corporate practice and develop investment models that can be applied by companies in their financial operations **Financial Markets and Corporate Strategy: European Edition, 3e** David Hillier, Mark Grinblatt, Sheridan Titman, 2023-02-03 The global pandemic restrictions climate change geopolitical tensions and new artificial technologies have fundamentally impacted international financial markets and corporate strategy Traditional finance theories have been questioned and their application to corporate decision making has come under scrutiny like never before The third edition of *Financial Markets and Corporate Strategy* provides students with comprehensive and engaging discussions on the strategic challenges facing companies and their financial decisions Brought to life by real world examples international cases and insights from recent research it guides students through the challenges of studying and practising finance from both an academic and practical viewpoint Key Features Fully updated research of the most important topics data and examples in every chapter Coverage of the impact of climate change Brexit the economic growth of China and new financial technologies A stronger emphasis on sustainability ethics and corporate governance Updates on accounting standards bankruptcy laws tax rules and tax systems David Hillier is Professor of Finance Executive Dean of Strathclyde Business School and Associate Principal of the University of Strathclyde Mark Grinblatt is the J Clayburn LaForce Professor of Finance at the UCLA Anderson School of Management Sheridan Titman is Professor of Finance at the McCombs School of Business Im Fun Financial Management Eugene F. Brigham, 2003-03 **Ratings** Peter Brusov, Tatiana Filatova, Natali Orekhova, 2020-12-04 This book presents new methodologies for rating non financial issuers and project ratings based on the BFO Brusov Filatova Orekhova theory of capital cost and structure and its perpetuity limit Modigliani Miller theory as well as modern investment models created by the authors It first provides a critical analysis of the methodological and systemic shortcomings of the current credit ratings of non financial issuers and project ratings In order to increase the objectivity and accuracy of rating assessments it then modifies the BFO theory for companies of arbitrary age as well as and the perpetuity

limit Modigliani Miller theory for rating needs The authors also incorporate the financial indicators used in the rating methodology into both the BFO theory and the Modigliani Miller theory Within the framework of the modified BFO theory for rating needs they then present a detailed study of the dependence of the weighted average cost of capital of WACC used as the discount rate for discounting financial flows on the financial ratios used in the rating on the age of the company on the leverage level and on the level of taxation for a wide range of values of equity cost and debt cost for companies of arbitrary age This makes it possible to correctly assess of the discount rate taking into account the values of financial ratios The use of well established corporate finance theories BFO theory and its perpetuity limit opens up new horizons in the rating industry providing an opportunity to switch from mainly qualitative methods for determining the creditworthiness of issuers to mainly quantitative methods in rating and as such improving the quality and accuracy of rating scores

**The Determinants of Capital Structure in Ethiopian Small Scale Manufacturing Industry Firms** Dereje Yohannis,2019-12-18 Master s Thesis from the year 2019 in the subject Business economics Investment and Finance grade 3 28 language English abstract The purpose of the study is investigating the determinants of capital structure for Small Scale Manufacturing Firms SSMFs in Ethiopia Hypotheses utilizing trade off pecking order and agency theories are empirically examined using a series of firm characteristics size tangibility profitability earning volatility age and macroeconomic variable GDP growth rate inflation rate and interest rate A structured record review was made to collect a panel data which include 20 SSMFs year observations of 11 years over the period 1998 2008 E C The findings suggest that profitability earning volatility age growth GDP inflation rate and interest rate variables are the most important determinants of capital structure of SSMFs in Ethiopia The findings also reveal that the dominant capital structure theories trade off pecking order and agency theories appear indeed to be valid for Ethiopian SSMFs capital structure in fact trade off theory best explains Ethiopian SSMFs capital structure All firm specific variables except Size tangibility and growth variables seem to have an effect on the level of leverage in Ethiopian SSMFs
