**Argumentation** Edward Schiappa, 2025-11-28 This book is an accessible reference guide to the key concepts associated with argumentation theory, criticism, and pedagogy. Providing an encyclopedic style synthesis, the book defines and describes 175 essential concepts of argumentation and provides discussion of the meaning, application, and impact, as well as offering suggestions for further reading. Readers are introduced to foundational reasoning methods: deductive, inductive, and abductive, as well as key argumentative models such as the Toulmin Model and Pragma-Dialectics. The text delves into the identification and analysis of fallacies, the evaluation of evidence, and the crucial roles of context, audience, adaptation, and argumentative style. It explores the ethical dimensions of argument, the impact of cognitive bias, and the influence of cultural and discourse communities. The first of its kind and a key entry point to understanding the fundamental principles of the field, this guidebook is ideal for undergraduate and graduate courses in argumentation, debate, rhetoric, and communication studies, as well as other related disciplines. It will also be of interest to the general reader looking to improve their analytical and decision-making abilities.

Grammatical constructions and relationships between words in a clause are explained and thoroughly illustrated, including grammatical relations such as subject and object function, changing processes such as the passive and antipassive case, and agreement processes including both ergative and accusative alignments, verb serialization, head marking, and dependent marking. Grammars, configurational and non-configurational languages, questions, and relative clauses. The final chapter explains and illustrates the principles involved in writing a brief syntactic sketch of a language, enabling the reader to construct a grammatical sketch of a language known to them. Data from approximately 100 languages appears in the text, with languages representing widely differing geographical areas and distinct language families.
