Spatial Modelling of Flood Risk and Flood Hazards Biswajeet Pradhan, Pravat Kumar Shit, Gouri Sankar Bhunia, Partha Pratim Adhikary, Hamid Reza Pourghasemi, 2022-04-06 Floods and flash floods with hydro meteorological and tropical cyclones are some of the most devastating natural disasters causing massive damages to natural and man made features. Flood hazards are a major threat to human life, properties, agricultural area, yield, production, buildings and homes, and infrastructures, bridges, roads, railways, urban infrastructures, etc. Flood hazards susceptibility mapping, risk assessment, and modelling is an essential step for early warning systems, emergency services, prevention, and mitigation of future environmental and social hazards and implementation of risk management strategies. Due to the lack of proper information technology based policies and strategies, mapping and modelling can often not be implemented to the best possible level. Geo spatial techniques have enjoyed rising interest in recent decades among the earth, environmental, and social sciences research communities for their powerful ability to solve and understand various complex problems and develop novel approaches toward sustainable earth and human society. By linking geo spatial computational intelligence techniques with societal and environmental oriented problems, this book demonstrates geospatial technology approaches to data mining, techniques, data analysis, modelling, risk assessment, and visualization and management strategies in different aspects of flood hazards. We believe that a diverse group of academics, scientists, geographers, hydrologists, remote sensing, and GIS expertise, environmentalists, meteorologists, and computing experts with a common interest in geospatial sciences within the earth, environmental sciences, and humanistic and social sciences will find this book to be of great value. Micro and Nanoelectronics Devices, Circuits and Systems Trupti Ranjan Lenka, Durgamadhab Misra, Arindam Biswas, 2021-09-09 The book presents select proceedings of the International Conference on Micro and Nanoelectronics Devices, Circuits and Systems, MNDCS 2021. The volume includes cutting edge research papers in the emerging fields of micro and nanoelectronics devices, circuits, and systems from experts working in these fields over the last decade. The book is a unique collection of chapters from different areas with a common theme and will be immensely useful to academic researchers and practitioners in the industry who work in this field. Computer Vision and Image Analysis for Industry 4.0 Nazmul Siddique, Mohammad Shamsul Arefin, Md Atiqur Rahman Ahad, M. Ali Akber Dewan, 2023-06-12 Computer vision and image analysis are indispensable components of every automated environment. Modern machine vision and image analysis techniques play key roles in automation and quality assurance. Working environments can be improved significantly if we integrate computer vision and image analysis techniques. The more advancement in innovation and research in computer vision and image processing, the greater the efficiency of machines as well as humans. Computer Vision and Image Analysis for Industry 4.0 focuses on the roles of computer vision and image analysis for 4.0 IR related technologies. The text proposes a variety of techniques for disease detection and prediction, text recognition, and signature verification, image captioning, flood level

Kapse,Lalit Garg,Pavan Kumar Shukla,Varadraj Gurupur,Amit Krishna Dwivedi,2025-04-30 This is the proceedings of the 1st International Conference on Applications of AI in 5G and IoT ICAAI5GI2024 It brings together ground breaking research and practical insights into integrating Artificial Intelligence within 5G and the Internet of Things IoT This compilation highlights the latest advancements and innovative solutions emerging at the intersection of AI 5G and IoT technologies It also delves into a wide array of topics including the role of AI in enhancing 5G network efficiency the development of intelligent IoT devices and the creation of smart environments powered by these cutting edge technologies It further showcases key findings on AI driven applications in 5G for seamless communication improved connectivity and advanced data processing techniques along with IoT solutions for smart cities industrial automation healthcare and beyond It would be a valuable read for researchers engineers and professionals in AI 5G IoT and related fields It serves as an essential resource for those seeking to stay at the forefront of technological advancements in these rapidly evolving domains **PROCEEDINGS OF INTERNATIONAL CONFERENCE ON**

COMPUTER SCIENCE AND COMMUNICATION ENGINEERING Dr. Arimanda Vara Prasad Reddy,Dr. Arimanda Vijaya Sarada Reddy,Sri Arimanda Siddharth Reddy,Dr. J B V Subrahmanyam,Dr. Y. David Solomon Raju, It is with great pride and enthusiasm that we present the proceedings of the First International Conference on Computer Science and Communication Engineering organized by Holy Mary Institute of Technology and Science Hyderabad This conference marks a significant milestone in our commitment to advancing innovation research and collaboration in the ever evolving domains of computer science and communication technologies In an era where digital transformation is rapidly redefining the global landscape fields such as Artificial Intelligence AI and Machine Learning ML have emerged as powerful drivers of sustainable progress From smart energy systems and intelligent healthcare solutions to advancements in agriculture and environmental conservation these technologies offer immense potential to address the critical challenges of our time This conference has provided a vibrant platform for researchers academicians industry leaders and students from across the globe to come together share knowledge and explore novel applications of AI ML and communication engineering aimed at sustainable development The overwhelming response and the diversity of contributions reflect the growing significance and global interest in these areas The range of topics featured in this volume showcases not only the depth of academic and practical research but also the spirit of innovation and collaboration that underpins this conference Each paper represents a step forward in our shared pursuit of technological solutions for a better more sustainable world We extend our sincere gratitude to all the keynote speakers session chairs reviewers authors and participants for their valuable contributions A special word of thanks goes to the organizing committee sponsors and dedicated volunteers whose tireless efforts have made this event a resounding success As you explore the proceedings we hope that the ideas and collaborations born from this conference will

continue to inspire impactful research and foster long term partnerships for a future that is both technologically advanced and environmentally responsible Organizing Committee ICCSCE 2025 **Proceedings of 2022 International Conference on Autonomous Unmanned Systems (ICAUS 2022)** Wenxing Fu, Mancang Gu, Yifeng Niu, 2023-03-10 This book includes original peer reviewed research papers from the ICAUS 2022 which offers a unique and interesting platform for scientists engineers and practitioners throughout the world to present and share their most recent research and innovative ideas The aim of the ICAUS 2022 is to stimulate researchers active in the areas pertinent to intelligent unmanned systems The topics covered include but are not limited to Unmanned Aerial Ground Surface Underwater Systems Robotic Autonomous Control Navigation and Positioning Architecture Energy and Task Planning and Effectiveness Evaluation Technologies Artificial Intelligence Algorithm Bionic Technology and Its Application in Unmanned Systems The papers showcased here share the latest findings on Unmanned Systems Robotics Automation Intelligent Systems Control Systems Integrated Networks Modeling and Simulation It makes the book a valuable asset for researchers engineers and university students alike

Emerging Disruptive Technologies for Society 5.0 in Developing Countries Sara Arezki, Mariya Ouaisa, Mariyam Ouaisa, Moez Krichen, Anand Nayyar, 2025-03-24 This book offers an overview of the recent disruptives technologies and their application in the new Society 5 0 for better human life The content provides researchers by new trends in blockchain IA and big data applied to several fields related to smart cities and Society 5 0 such as health care education finance mobility logistics and quality of life It is an opportunity for researchers and practitioners to present and discuss their most recent research results innovations experiences concerns challenges and trends about the application of disruptive technologies applied to Society 5 0 The aim of the book is to focus on how disruptive technologies can change the way we perform and how it creates more opportunities with a special focus on AI blockchain big data etc The idea behind this book is to focus on solutions based on disruptive technologies that can face the challenges of the developing countries We will shed the light on different sectors such as education agriculture industry transportation environment energy health care etc We will discuss the challenges that the emerging countries face in these sectors and provide disruptive technologies based solutions to them This book also introduces success stories of disruptive technologies based solutions and their impact on the lives of people in developing countries **Digital Twin Technology and Applications** A.
