wireless communication and networks and other allied fields      **Handbook of Research on Inventive Digital Tools for Collection Management and Development in Modern Libraries** Thanuskodi, S.,2015-07-17

The quality of library collections depends heavily on the initial assessment requirements. An accurate assessment assists with meeting the goals and missions of the library but the introduction of digital media and resources is accompanied with new challenges in measuring the effective use of the library's collection. The Handbook of Research on Inventive Digital Tools for Collection Management and Development in Modern Libraries details how libraries strive to bridge traditional collections with their new digital counterparts. Providing real world examples and analysis of the modern library, this publication is a timely reference source for professionals and researchers in the fields of library and information science as well as executives interested in information and organizational development.

**Serving Library Users from Asia** John Hickok,2019-06-12

Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published e.g. disabled, Latino, seniors etc, few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters, each on 24 specific Asian countries, cultures of East, Southeast and South Asia, with a wealth of resources for understanding, interacting with, and serving library users of each culture. Resources include cultural guides, both print and online, language helps with sample library vocabulary, Asian booksellers nationwide, cultural groups, professional literature and more. Resources and suggestions are given for all three types of libraries: public, school and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution, plus history of immigration and international student enrollment is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems and more of public school and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described, literacy levels, reading cultures, languages and writing systems, educational systems and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

**Modern Technologies for Reshaping Libraries in the Digital Era** Sivasankar Prasad,2017-07-10

Anthology from the year 2017 in the subject Library Science, Information Documentation Science, University of Delhi, language English, abstract. There are a variety of challenges facing the LIS profession owing to the rapidly changing technologies and environment in which it exists. Recent developments in ICT, the web and social media have led to the creation of digital resources and its access through online as well as remote login. Librarians need to be tech-savvy professionals who can take all their professional skills and experience and adapt them in order to align library services with the changing demands of the library user community. Written by practicing library professionals and librarians, this book
