

## Beyond disaster recovery: TenCate leverages multiple benefits of Zerto Virtual Replication

Two years ago, TenCate North America knew that its legacy BC/DR solution was too cumbersome and unreliable. A multinational textiles technology company, it has sites in California, Tennessee, Texas, Canada, and has its North American headquarters in Georgia. TenCate needed to protect its multiple sites and acquisitions, along with finding a solution that would be easy to use.

TenCate looked at VMware Site Recovery Manager (SRM) and turned it down because SRM could not meet its service level demands, nor adequately manage replication across its heterogeneous IT environments. According to Senior Systems Engineer Jayme Williams, an advisor suggested that TenCate evaluate Zerto Virtual Replication (ZVR). After Williams presented to his management how Zerto ZVR could move a virtual machine (VM) between locations with different storage arrays in a matter of minutes, TenCate immediately made ZVR its BC/DR solution.

After implementing ZVR, TenCate decided to shed Symantec Backup Exec and start using Veeam for longer-term backups. Williams found that Veeam Virtual Lab was cumbersome and did not perform consistently. He then found out how much more effectively Zerto worked in TenCate's 100 percent virtual environment.

"Someone suggested that we do a test failover of Zerto," explained Williams, "and the thought was like a lightbulb, well why didn't I think of that? That's obvious! I went to in Zerto 'Tests-Failover', and boom! There's your sandbox, you can play in it, and do whatever you want. I finished it and turned it off. It is literally click 'test', 'failover'. Even though Veeam is built for the virtual world, it didn't even do this as easily."

### Beyond disaster recovery

Williams began to find and implement more uses for ZVR, starting with off-site backup.

"At the beginning of this year, my boss said we are doing disk backup of all the systems at remote sites over the local area network, and we have Zerto in these same systems," explained Williams. TenCate had copies of each site at its Georgia data center. "He asked why do we have to back them up again across the WAN? I brought that question up during a call with Zerto, and they asked whether we had the latest version. We checked, and I downloaded the new version, and that gave me off-site backup. A week later my boss asked me again, and I said that I can do that now—with this version of Zerto we have an off-site backup function. He asked how much does that cost? I said it's nothing, it is included in the solution."

### Challenges

TenCate with Zerto Virtual Replication had solidified its BC/DR program, and was seeking ways to improve long-term data retention, promote ease of use, manage its cloud migrations, and save money.

### Solution

Zerto Virtual Replication enabled TenCate to shed older solutions, boost its long-term backup, failover to and from remote locations, simplify its disaster recovery plan and extend it beyond IT, and migrate critical servers and apps into AWS.

---

**"Without Zerto, we would be back in the physical, non-virtual world, where recovery time and recovery points are going to be days. I'm looking at my Zerto panel, and the longest RPO I've got is six seconds. Without this solution, we would have to backup from yesterday, which means we lose 24 hours, plus however long it takes to get to a remote site and restore everything, get it back the way you like it, turn it on and say okay, you're back in production. With Zerto, you click 'move' and 15 minutes later it's in production."**

— Jayme Williams, Senior Systems Engineer, TenCate North America
