Instructional Module for the Course
Soils1100 - PRINCIPLES OF SOIL SCIENCE

Module 1 - Introduction to Soil Science

Overview

In this module, basic principles and concepts regarding functions of soil resource, its genesis and formation, the dynamism of its composition, and profiling will be discussed. It also introduces the relationships of soil to current concerns in sustainable agricultural land use and upholding the environmental quality of agroecosystem. This course inculcates the awareness of soil utilization that can lead to conservation or degradation as a natural resource. Management practices in this resource has a considerable influence not only on human society but the life in general.

The topics that will be discussed in this module are as follows;

- Importance and functions of the soil as a natural resource
- Definition and composition of soil
- Soil Genesis: Soil Formation and development
- The study of soil profile

I. Objectives

On successful completion of this module, students will be able to;

1. Link the importance of soil in its different functions as a resource.
2. Inculcate the basic foundation of soil as a body of science in agricultural environment.
3. Understand the process of soil formation and its function in soil science.
4. Explain the development of soil based on pedogenic approach as part of the geologic processes.
