Cardoso, Markus Helfert, Claus Pahl, 2018-07-13 This book constitutes extended revised and selected papers from the 7th Ith International Conference on Cloud Computing and Service Science CLOSER 2017 held in Porto Portugal in April 2017 The 16 papers presented in this volume were carefully reviewed and selected from a total of 123 submissions CLOSER 2017 focused on the emerging area of Cloud Computing inspired by some latest advances that concern the infrastructure operations and available services throughout the global network *Internationalisation in the Cloud. An explorative case study into the foreign market expansion of SaaS providers* Christina Küppers, 2017-07-17 Master's Thesis from the year 2016 in the subject Business economics Business Management Corporate Governance grade 1.0 Copenhagen Business School Department of Intercultural Communication and Management language English abstract This thesis investigates the internationalisation complexities of cloud technology vendors To enhance the understanding of foreign market expansion of cloud providers this study sought to answer the overarching research questions how do cloud providers internationalise and is available literature to date still relevant for cloud technology vendors The researchers utilised a single case study of NN an expanding Danish cloud SME to provide in-depth insights for the business literature realm which has so far attracted scarce research Literature has focused almost exclusively on SMEs MNCs and born globals but cloud providers were mostly ignored To date little systematic investigations have considered that the dynamics and processes of internationalisation significantly change in a cloud context The most important contribution is a research model encompassing twelve moderator variables impacting the performance of cloud firms Their suggested influence was drawn from a thorough theoretical analysis of contemporary internationalisation literature from the 1950s to the present day Thereby both versions of the Uppsala Model of Internationalisation by Johanson and Vahlne 1977 2009 were selected as suitable to provide structure for the research model namely the process model and the network model Complementing the four categories of the Uppsala Model the research model was enhanced with two additional categories so as to examine cloud vendor internationalisation Using a sample of five employees who are directly responsible for internationalisation activities of the case company NN this thesis offers interesting insights into the complexities of cloud internationalisation The findings illustrate that internationalisation literature to date is still useful for examining internationalisation performance and in particular the network model However since cloud vendors mainly operate virtually this brings forth many advantages and disadvantages which have previously not been considered Theoretical contributions and implications for future research are discussed This thesis provides support for ten out of twelve items and offers various compelling areas for future research *Dhaka University Journal of Business Studies*, 2021 **Cloud Computing** Dan C. Marinescu, 2017-11-20 Cloud Computing Theory and Practice Second Edition provides students and IT professionals with an in-depth analysis of the cloud from the ground up After an introduction to network centric computing and network centric content in Chapter One the book is organized into four sections Section One reviews basic concepts of concurrency and parallel and distributed systems Section Two presents such critical components of

the cloud ecosystem as cloud service providers cloud access cloud data storage and cloud hardware and software Section Three covers cloud applications and cloud security while Section Four presents research topics in cloud computing Specific topics covered include resource virtualization resource management and scheduling and advanced topics like the impact of scale on efficiency cloud scheduling subject to deadlines alternative cloud architectures and vehicular clouds An included glossary covers terms grouped in several categories from general to services virtualization desirable attributes and security Includes new chapters on concurrency cloud hardware and software challenges posed by big data and mobile applications and advanced topics Provides a new appendix that presents several cloud computing projects Presents more than 400 references in the text including recent research results in several areas related to cloud computing

*Cloud Data Centers and Cost Modeling* Caesar Wu, Rajkumar Buyya, 2015-03-02 *Cloud Data Centers and Cost Modeling* establishes a framework for strategic decision makers to facilitate the development of cloud data centers Just as building a house requires a clear understanding of the blueprints architecture and costs of the project building a cloud based data center requires similar knowledge The authors take a theoretical and practical approach starting with the key questions to help uncover needs and clarify project scope They then demonstrate probability tools to test and support decisions and provide processes that resolve key issues After laying a foundation of cloud concepts and definitions the book addresses data center creation infrastructure development cost modeling and simulations in decision making each part building on the previous In this way the authors bridge technology management and infrastructure as a service in one complete guide to data centers that facilitates educated decision making Explains how to balance cloud computing functionality with data center efficiency Covers key requirements for power management cooling server planning virtualization and storage management Describes advanced methods for modeling cloud computing cost including Real Option Theory and Monte Carlo Simulations Blends theoretical and practical discussions with insights for developers consultants and analysts considering data center development
